Subject: Water Metering of Wells WMIS 200352, WR#25-12185

Dear Mr. Jordan:

The LDS Church were requested to install water meters on two wells located at the Church owned property located in Lewisville, Idaho in a letter from your Department dated May 21, 2018 with ID No. 120-200352. The Church owns two wells located on this property. One is used for irrigation of the Lewisville Park, also owned by the Church. The other is used to supply water to the church house and surrounding landscaping.

The first was identified as WMIS #1001906 and appears to be tied to WR# 25-12186 which has an allowed use of 0.17 cfs or 8.5 acres. It is used to irrigate the park area. The Church is in process of installing a water meter on this well. Your office will be notified when the meter is installed so that it can be inspected.

The second is WMIS# 200352 and appears to be tied to WR #25-12185 which has an allowed use of 0.04 cfs, maximum of 13,000 gallons per day. This well is used to provide domestic water to the building and a small portion of the surrounding landscaping around the building. It currently has a drinking water tag on the well and is monitored for culinary uses. The tag is E0007620 and is used for sampling for water quality.

Since this well is primarily used for domestic purposes in the building we are requesting that the requirement to meter this well (WMIS# 200352) be removed. It does not appear to meet the requirements for metering within the law for irrigation wells.

The accompanying map shows the location of the two operational wells, along with their associated water right number. It also shows the location of two abandoned wells that were replaced by the two existing wells. The wells were abandoned in 2015 when the new wells were installed.

If you need additional information, please contact us.

Sincerely yours,

A handwritten signature in blue ink, appearing to read "Matt Davidson". The signature is fluid and cursive, with the first name "Matt" being more prominent than the last name "Davidson".
