Subject: Eagle Spring Valley Second Half of 2017 Ground Water Monitoring Data Submittal

Dear Gary:

On behalf of my client, M3 Companies, LLC, and the City of Eagle, Idaho, I write to submit the Spring Valley (formerly M3 Eagle) water level monitoring data for the second half of 2017 that is being hand-delivered to your office today, Wednesday, January 3, 2018 on compact disc. The submittal was due on, or before, December 31st but that date fell on a Sunday and my skeletal holiday office has been down with the flu until today. The submitted data consist of hand-measured and digitally recorded pressure-transducer/data-logger measurements acquired between 5/31/2017 and 11/30/2017. The Idaho Department of Water Resources (Department) issued a Second Amended Final Order for Water Right No. 63-32573 in the name of the City of Eagle on March 9, 2012. One of the conditions of approval for the water right requires the permittee to monitor the ground water resource in the area according to a monitoring and reporting plan developed by Hydro Logic, Inc.

Hydro Logic, Inc. is under contract with the M3 Eagle, LLC under agreement with the City of Eagle, who owns the water right, to perform the Spring Valley ground water monitoring and reporting requirements. Pursuant to the monitoring plan approved by the Department, Hydro Logic, Inc. submits these raw uncorrected data in compliance with the water right requirement. To date, other than hydraulic testing of new wells, there has been no municipal ground water production diverted under Permit No. 63-32573 so there are no water diversion volumes to report. Until such time that ground water production begins under this permit, there are also no requirements for data synthesis or an interpretive report of the data.

During this monitoring period, there are no significant changes or data glitches to report. As always, any notes or changes that did occur are contained within the data spreadsheet.

Finally, and as noted in the first half 2017 submittal, the ownership of the Spring Valley land remains with M3 Eagle, LLC although the M3 Companies, LLC is no longer involved with the project. Hydro Logic, Inc. remains as the entity charged with ground water monitoring and our client remains as M3 Eagle, LLC. If ever, HLI was no longer tasked with the water level monitoring for this area, I would, of course, personally contact and inform the Department.

Respectfully,

Ed Squires

c: Todd Rosa, M3 Eagle, LLC
Ken Acuff, City of Eagle
Ed Squires, Hydro Logic, Inc.
