Subject: Draft Approval for Transfer 82297 (Gunderson)
Attachments: Draft Transfer 82297 (6-20-18).pdf

Fred,

Application for Transfer 82297, filed by Garth & Bonnie Gunderson, proposes to change the point of diversion for a 3.2-acre portion of water rights 35-14174, 35-14176 and 35-14178. You protested the application on May 21, 2018. Your letter states that the protest could be resolved if conditions were added to the approval confirming that the point of diversion and place of use do not include federal public lands.

Attached is a draft transfer approval. The 3.2-acre split portions (water rights 35-14583, 35-14584 and 35-14585) include the proposed conditions. The remaining portion of the rights include a condition consistent with the partial decree stating that the place of use does not include federal lands. If the approval satisfies your issues of protest, feel free to file a withdrawal referencing the 6/20/18 draft approval.

Please note, Application for Transfer 82306 proposes to change the point of diversion for a 15-acre portion of the same rights listed above. Even though you did not protest that application, we will include the same conditions on that transfer approval.
