

MEMORANDUM

Date: June 18, 2018
To: Water Right File 63-34558
From: Renumber
Re: Renumber WR 63-34558

This has been renumbered from 2-7466. The permit was renumbered in 1995 from 63-12167 because the point of diversion is a well located on an island in the Snake River. The right was mistakenly renumbered to 2-7466, though this stretch of the Snake River is considered Basin 3. The right is renumbered to 63-34558 because there is another right using the same well that is numbered Basin 63. The license is recommended with the Snake River as the tributary to account for the 1995 interpretation that the well was connected to the Snake River.
