

MEMORANDUM

TO: Water Right Permit File 97-7417

FROM: Daniel A. Nelson

DATE: June 20, 2018

SUBJECT: License Status Corrected

This permit was marked in the data base as being licensed on 4/8/2016. However, there was no license in the data base. I contacted the last know person to work on this file at the State Office and determine that it was sent to Northern Region. Northern Region was supposed to clarify dam safety issues and then license the water right permit.

I contacted the Northern Region office, and they found the Dam Safety file on the dam for this right, but nothing else to suggest it had been licensed. There is no license in the file and there doesn't appear to have been a license issued. Northern Region office will take over the licensing of this permit.

It appears as though there was a data entry error when the license date of this permit was entered. I have checked all of the sources available, and it appears as though no license has been issued for this permit. I corrected the data base on June 20, 2018 to show that the permit has not been licensed.
