DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No. 75-148991. Name of applicant(s) CORY R ALBERT, KRISTIN M ALBERT Phone 208.865.1181Name connector (check one): ☐ and ☐ or ☒ and/orMailing address 2862 HWY 93 N City GIBBONSVILLEState ID _____ ZIP 83463 Email tobekit@hotmail.com

2. Name of representative, if any _____ Phone _____

Mailing address _____ City _____

State _____ ZIP _____ Email _____

a. ☐ Send all correspondence for this application to the representative and not to the applicant OR☐ Send original correspondence to the applicant and copies to the representative.b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.3. Source of water supply SALMON RIVER, NORTH FORK which is a tributary of SALMON RIVER

4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
25N	21E	11			SE	SW	LEMHI	N F SALMON RIVER	

5. Water will be used for the following purposes:

Amount 0.03 cfs for IRRIGATION purposes from 04/01 to 10/31 (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)6. Total quantity to be appropriated is (a) 0.03 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

7. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. Electric pump, 1 to 1.5 HP, mainline and sprinklersb. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No

c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.

d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No

e. If well is already drilled, when? _____; drilling firm _____; well was drilled for (well owner) _____; Drilling Permit No. _____

This application proposes the diversion and use of water from a tributary of the Salmon River Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because the diversion rate and acre will be applied to the subordination amounts specified in the decree for the Wild & Scenic River listed above.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact the State office at (208) 287-4800; or for a full description of the right(s), please see <https://idwr.idaho.gov/apps/ExtSearch/WRApplicationResults/>. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, State Office, 322 E Front St, PO Box 83720, Boise, ID 83720 together with a protest fee of \$25.00 for each application on or before **6/25/2018**. The protestant must also send a copy of the protest to the applicant.

Application For Permit No. 75-14899

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 6/7/2018 and 6/14/2018. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in cursive script that reads "Jean Hersley".

MEMORANDUM

Date: May 31, 2018
To: Application for Permit 75-14899
From: Dave Betts
Re: Application Review

Applicant

Cory and Kristin Albert submitted an application for permit on April 24, 2018. The applicants own the land where the proposed point of diversion (POD) and place of use (POU) were identified per available Lemhi County parcel map information.

The legal description for the POU when first submitted did not match the POU figure in the map submitted by the applicants. 0.4 acres of irrigation were assigned to the SESE of Section 11, which is federal land, instead of the SESW. On May 17th, I sent a letter and an email explaining the difference between the map and the legal description and how to correct the legal description. The letter was included in the same mailing as the Letter of Public Interest. Corrections were made on a copy of the second page of the Application for Permit, with initials and date. The corrections were received by mail on May 29th, and are now included with the original Application for Permit.

The Letter of Public Interest was also returned on May 29th with a note, signature and date stating "No Comment".

Source & POD

The application proposes to divert water from the North Fork of the Salmon River in the SESW of Section 11, T 25N R 21E in Lemhi County, which is within a Wild and Scenic area and subject to those processing steps.

The proposed diversion is an electric pump, 1 to 1.5 HP, mainline and sprinklers.

Water Use

The proposed use is Irrigation for 1.0 acre of land. The applicant requested the standard irrigation season from 04/01 to 10/31.

POU

The places of use are to irrigate the yard next to the house, in the SESW (0.4 acres) and SWSE (0.6 acres) of Section 11, T 25N R 21E.

The shape file for the POU was based on the drawing submitted by the applicants. ArcGIS calculated the combined area from the SESW and SWSE as 1.0 acres.

POU/POD overlap analysis

There are 23 records for surface water diversions (PODs) downstream of the proposed POD over the 3.4 miles before the confluence with Hughes Creek. Advertising will determine if there are any concerns regarding supply.

The POD and a portion of the POU overlap two generally described shapes for domestic use groundwater Rights 75-10010 and 75-10132 associated with other tax parcels. Two POU's for

surface water irrigation under Rights 75-4077 and 75-7103 include portions of the same quarter-quarter, but do not overlap with the proposed POU.

The application states that the proposed beneficial use will water the yard which was previously irrigated using water from the domestic well. Total irrigation proposed exceeds the exempt domestic use allowing 0.5 acre of irrigation from the domestic well, requiring this water right.

Conditions

This permit should include standard conditions for irrigation use, use within the Salmon Wild & Scenic River and a condition noting use is not located on federal land as the property borders Forest Service lands in the SESW.

RE: Application to Appropriate Water in the Upper Salmon River Basin 75-14899

Dear Water Right Applicants:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

No Comment
Kristin Mallett
5/23/2018

RECEIVED

MAY 29 2018

DEPARTMENT OF
WATER RESOURCES

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the Comprehensive State Water Plan revised by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery.

Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

for 
Pamela Skaggs
Water Rights Supervisor

MEMORANDUM

Date: May 17, 2018
To: Application for Permit 75-14899 - Albert
From: Dave Betts
Re: Email to applicants re: POU clarification letter and LPI letter

Copy of Email

From: Betts, David
Sent: Thursday, May 17, 2018 11:30 AM
To: 'tobekit@hotmail.com'
Subject: Questions regarding your Application for Permit: 75-14899
Attachments: POUclarification_75-14899_Albert_markup.png;
75-14899_Albert_scannedapp.pdf;
POUclarification_Ltr_75-14899_Albert.pdf; LPI_Ltr_75-14899_Albert.pdf

Dear Cory and Kristin Albert,

I have attached copies of two letters to you regarding your Application for Permit for a Water Right (75-14899). Both letters are in the same envelope, and are going out in today's mail, May 17, 2018.

The first letter is regarding discrepancies in the description of the place of use for your application. The written description of the place of use does NOT match the figure you submitted in your map. Your map places 0.4 acres in the SE quarter of the **SW** quarter of Section 11, T 25N R 21E. The written description indicates the SE quarter of the **SE** quarter of Section 11. **The Department of Water Resources (IDWR) has to process your application according to the written description.** In an image attached below, I have marked the two spaces in the table that would need to be changed in order for the written description to agree with the figure in your map. Please double check this information before sending any corrections.

Because the Application for Permit is a legal document, **applicants have to make any amendments in writing.** Changes to the table in item 9 on page two of your application need to be signed with your initials and the date. You can cross out the error and write in the "0.4" acres in the correct space on a copy of page two of your application, as long as you submit a hard copy with your original initials and date to IDWR. I have included a copy of your application in the letter and as an attachment to this email.

The second letter gives you an opportunity to provide additional information that may assist with the permitting process. In order to give you an opportunity to respond to the second letter there is a 30-day waiting period before your application can move on to the next step. If we receive no response by the end of the 30 days, your application will move forward with the information we have.

If we receive a response from you to both letters before the 30-day waiting period is over, we can proceed with your application at that time.

Please contact me if you have any questions regarding either letter.

Thanks,

Dave Betts
