1. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. 5. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
6. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
7. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
9. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Measured Method:

Theoretical calculation. See attachment. $Q = 3.65$ cfs. Proof of beneficial use report indicates maximum diversion rate diverted out of the well is 2.0 cfs. In a phone conversation with Dennie Barson, he indicated that the maximum diverted out of the well is 2.0 cfs.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 219.0 \text{ acres} \times 3.5 \text{ acre-feet/acre} = 766.5 \text{ acre-feet}$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 2.0 \text{ cfs} \times 214 \text{ days} \times 1.9835 = 848.9 \text{ acre-feet}$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 766.5 \text{ acre-feet}$$

2. Volume Calculations for Other Uses: N/A

G. NARRATIVE/REMARKS/COMMENTS

The point of diversion consists of a Diesel Engine motor to a gear driven pump. Horse power of the pump is 110. Delivery system consists of an eight inch main line to wheel lines and hand lines. Pump was not running during field exam. Several sections of wheel lines were found on the property during the field exam. Per phone conversation with Dennie Barson (9/22/2014), the land developed under permit 13-7192 is currently in CRP. According to Mr. Barson the irrigation system consisted of six wheel lines and some hand lines. Mr. Barson indicated the maximum amount of water diverted out of the well is 2.0 cfs. The attached theoretical calculation indicates that the well could divert up to 3.65 cfs. The place of use and total number of acres irrigated (219.0 acres) under the permit was determined by the site visit, aerial photography and phone conversation with Mr. Barson. 70.0 acres under the place of use is located in the State of Utah. The permit indicates that Dennie Barson and Rudger Barson are the current owners. Rudger Barson is deceased.

Have conditions of permit approval been met? ☒ Yes ☐ No

13			Narrative The applicant wishes to place a portion of water right 13-7192 in the Bank (64 of the total 219 acres). Initially, the application requested to lease the 64 acres at a higher rate than what would be proportional. The volume and rate leased must remain proportional to the leased acres. An amended application was received April 9, 2018 which reflected a proportional rate and volume for the leased acres. The application states that the portion of the water right offered to the WSB is currently in a CRP contract; however the leased POU will not be irrigated. The water right was licensed in 2014 and there are no concerns of forfeiture. There no overlapping POUs or PODs. A Private Part Lease Agreement was submitted as part of this lease/rental package. Comments were requested from IDWR Eastern Region.

RE: Additional Information Request for Processing Application to Lease
Water Right No. 13-7192 to the Water Supply Bank

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Idaho Department of Water Resources (Department) acknowledges receipt of the application to lease the above referenced water right to the Water Supply Bank.

A preliminary review of your application has been completed and it has been determined that additional information is required to continue processing. Your application proposes a lease of 64 acres. The rate and volume leased must be proportional to the acres offered to the Bank. Therefore, a lease of 64 acres would have the following proportional rate and volume:

Lease

	Rate (CFS)	Rate/Acre	Volume (AF)	Vol/Acre	Acres
Water Right Total	2.0	0.01	766.5	3.5	219
Leased Portion	0.64	0.01	224.0	3.5	64

To fulfill the rental that was submitted with your application, a lease of 131 acres of your water right would be required as follows:

Rental

Applicant's Requested Rate (CFS)	Rate/Acre	Volume	Applicant's Irrigated Acres	Proportional Acres of Leased Right Required
1.31	0.04	458.5	30	131

Please let us know whether you would like to lease 131 acres to fulfill the rental request or only the 64 acres originally submitted for lease. There may be additional leased acres in the Bank available for the applicant to rent; however, availability is not guaranteed.

A map of acres to be idled according to this lease is also required. Please indicate on the attached map which acres will not be irrigated while the right is leased to the Water Supply Bank and return the map to our office at the address listed above.

The department will continue processing your application once you have submitted the requested information. **Without this information, your application will be returned unprocessed and the application fee refunded.**

If you have any questions, please contact this office at (208) 287-4912.

Respectfully,

Rachael Smith
Water Resource Agent, Sr.
