Subject: Re: water right transfer correction

Yes, Michael it looks good.

We want to change point of diversion rather than add a point of diversion.
Also we we agree to the point of diversion.

Thanks for all your help with this.

Hello Guy,

Yesterday we discussed a couple of issues with the transfer application you recently submitted for water right 29-14138. Over the phone you indicated that the purpose of the transfer was to change the point of diversion rather than add a point of diversion. You also agreed that the proposed new point of diversion should be in the NESE Sec 22 T6S R33E. I have attached a new page 1 of the transfer application for your review. If this looks acceptable to you, please let me know by your reply, and we will begin processing your application. If you have any questions feel free to give me a call.
