RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. The following rights are diverted through point(s) of diversion described above: 63-34481 and 63-34483.
10. Point of diversion is located within Lot 13, Blk. 1, Deersky Ranch Subdivision.
11. Place of use is located within Lot 13, Blk. 1, Deersky Ranch Subdivision.
12. The period of use for irrigation under water right 63-34483 described in this approval may be extended to a beginning date of 3/1 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 5/2/2008.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

63-32970 34483	Irrigation	0.55	213.0	62		0.008	3.1	0.9
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.018	4.1	0.9
						CFS	AF	AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

MEMORANDUM FOR RENTAL AGREEMENT # 237

To: Water Rights 63-34481 & 63-34483

From: Rachael Smith

Date: March 27, 2018

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank for James and Virginia Thompson

PURPOSE/NARRATIVE:

An application to rent water from the State Water Supply Bank was received on March 19, 2018. Applicants James and Virginia Thompson request a groundwater rental to irrigate 0.9 acres on their property. They request rental of water rights 63-34481 & 63-34483 (lease contract 787) which are their own water rights. The parent rights 63-32968 and 63-32970 were leased into the Bank indefinitely in 2012 and have since been renewed with a lease end date of 12/31/2020. Since then, rights have been split from these parent rights and maintained as a lease in the Bank. This rental request is for the property owners to rent their own portion of the leased water rights from the Bank. They requested a rental through the 2020 calendar year.

AUTHORITY TO FILE:

The rental application was signed by James and Virginia Thompson. The rental place of use and point of diversion are owned by James Thompson as shown by 2018 tax records.

WATER RIGHT VALIDITY:

Water rights 63-32968 and 63-32970 were leased indefinitely to the WSB in 2012. In 2018, under transfer number 82039, water right 63-32968 was split into multiple rights which included 63-34481 and 63-32970 was split into other rights which included water right 63-34483, both owned by the Thompsons. There are no forfeiture concerns for these two rights.

INJURY TO OTHER WATER RIGHTS:

This rental proposes to rent the water rights at actual leased places of use as approved through transfer number 82039. There is no point of diversion overlap and no injury is expected.

ENLARGEMENT OF USE:

No rights overlap the two rights at the rental POU. The rental will be limited to the rates and volumes per acre defined on the water right. No enlargement is anticipated.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The location for the rental is not subject to a Water District. Comments were requested from IDWR Western Regional Office.
