4. If the water rights and/or adjudication claims were split, how did the division occur?

- ☐ The water rights or claims were divided as specifically identified in a deed, contract, or other conveyance document.
☒ The water rights or claims were divided proportionately based on the portion of their place(s) of use acquired by the new owner.

5. Date you acquired the water rights and/or claims listed above: _____

6. If the water right is leased to the Water Supply Bank changing ownership of a water right will reassign to the new owner any Water Supply Bank leases associated with the water right. Payment of revenue generated from any rental of a leased water right requires a completed IRS Form W-9 for payment to be issued to an owner. A new owner for a water right under lease shall supply a W-9. Water rights with multiple owners must specify a designated lessor, using a completed Lessor Designation form. Beginning in the calendar year following an acknowledged change in water right ownership, compensation for any rental will go to the new owner(s).

7. This form must be signed and submitted with the following **REQUIRED** items:

- ☒ A copy of the conveyance document – warranty deed, quitclaim deed, court decree, contract of sale, etc. The conveyance document must include a legal description of the property or description of the water right(s) if no land is conveyed.
☒ Plat map, survey map or aerial photograph which clearly shows the place of use and point of diversion for each water right and/or claim listed above (if necessary to clarify division of water rights or complex property descriptions).
☒ Filing fee (see instructions for further explanation):
☐ \$25 per undivided water right.
☐ \$100 per split water right.
☐ No fee is required for pending adjudication claims.

1. SCOPE OF THIS REPORT

SPF Water Engineering (SPF) was asked to review water right records in the name of John J. Hockberger, Sr. (Hockberger) in advance of land sales and water right distributions resulting from the settlement of Hockberger's estate.

The Hockberger property is comprised of approximately 130 acres located at the southwest corner of Riverside Road and Lowell Road in Canyon County, Idaho. The boundary of the Hockberger property shown in Figure 1 was provided by Gary McAllister and employed to locate appurtenant water rights through use of geographic information system (GIS) data provided by the Idaho Department of Water Resources (IDWR). Additional water rights held by Hockberger were identified by searching IDWR's database using the Hockberger name. The public records of IDWR were accessed to examine the current record of each water right identified. The results of our investigation are detailed in Section 2.

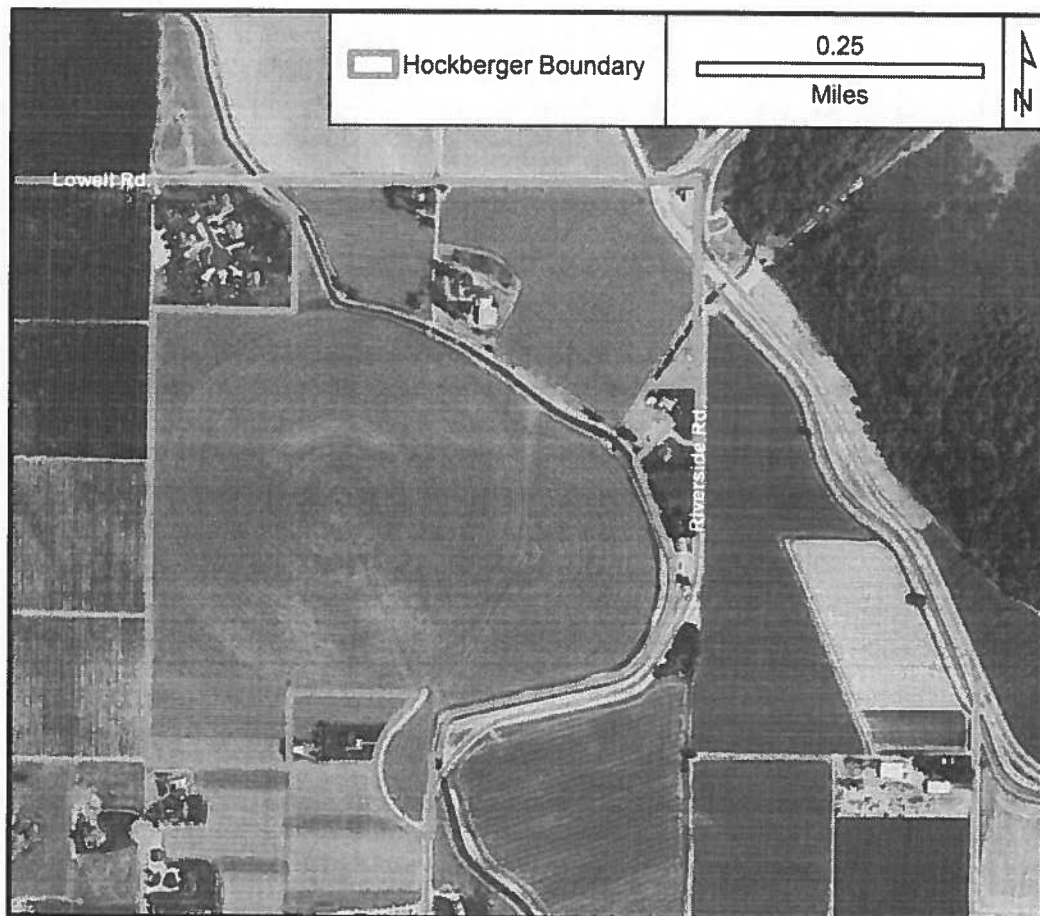

Figure 1. Hockberger Property Location
2013 NAIP Photography

We understand the Hockberger land and water rights are to be dispersed in several pieces as shown in Figure 2 and described as follows:

- Land Area 1 (the Orchard parcel) will be sold with appurtenant water rights.
- Water rights appurtenant to Land Area 2 were withheld by Hockberger at the time lots in Vinecrest No. 2 Subdivision were sold. The Estate intends to convey water rights sufficient to irrigate the Vinecrest lots to the individual lot owners.
- Land Area 3 will be subdivided and sold as individual residential lots. Water rights appurtenant to Land Area 3 will be conveyed to the developer, or a related entity.
- Land Area 4 will be conveyed to Jack Hockberger.

A summary of the appurtenant water rights for each land area is included in Section 3. There are no water rights appurtenant to Land Area 4.

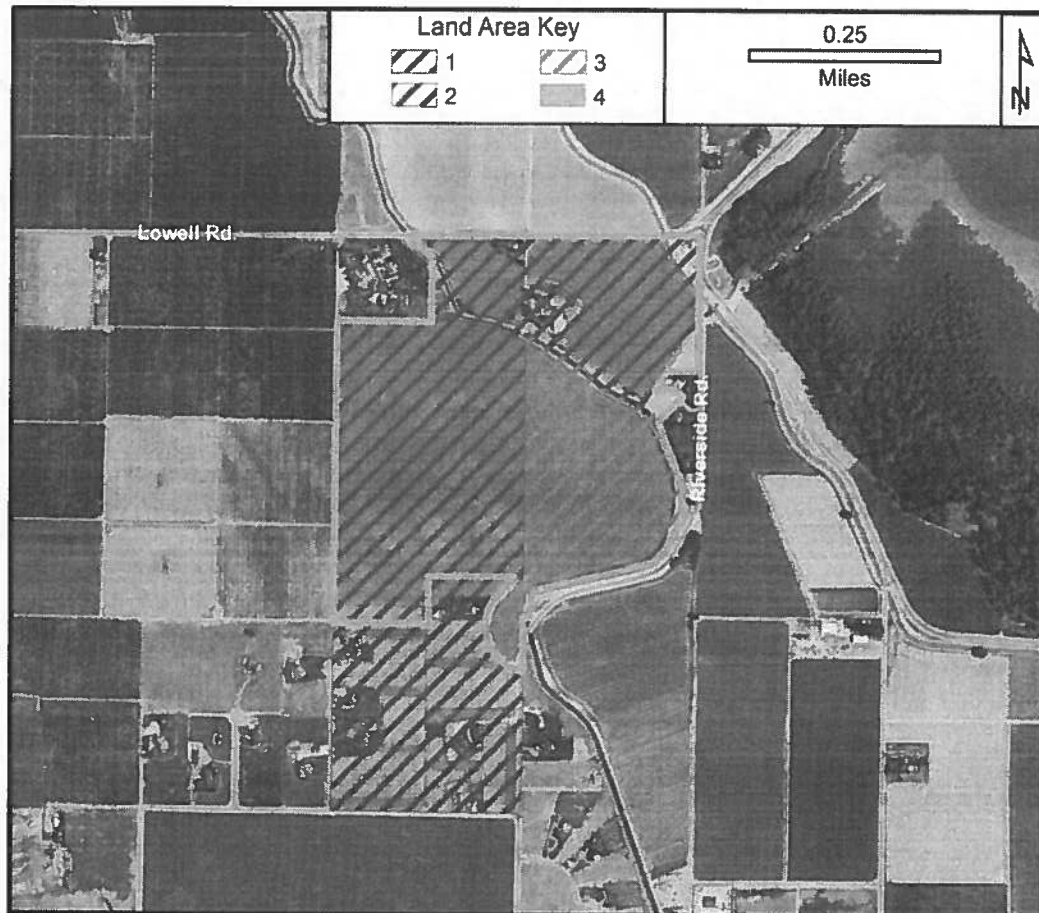

Figure 2. Land Areas for Distribution

2. REVIEW OF CURRENT WATER RIGHTS

The privately-owned Hockberger water rights are summarized in Table 1. Individual water rights are described below. In total, the Hockberger rights authorize diversion of 2.80 cfs (approximately 1,260 gpm) from groundwater wells for the irrigation of 151 acres.¹ Total volume is limited to 4.5 acre-feet per irrigated acre. Water right locations (including well sites) are shown in Figure 3.

Table 1. Water Right Summary

Water Right No.	Priority Date	Authorized Use	Diversion Rate (cfs)	Diversion Volume (ac-ft)		Area (ac)	Combined Area (ac)	
63-31820	6/13/1977	irrigation	1.05	473.0	499.5	56.0	105.0	111.0
63-2798	4/26/1953	irrigation	0.70			65.0		
63-8475	1/26/1996	irrigation	1.05			65.0		
TOTAL			2.80	473.0	499.5	186.0	105.0	111.00

Water Right No. 63-2798

Water right 63-2798 authorizes diversions from two groundwater wells located in the NESE, Section 25, Township 3N, Range 4W (Well B and Well C on Figure 3). The maximum diversion rate allowed from the wells is 0.70 cfs (approximately 315 gallons per minute, or gpm). Water rights 63-2798 and 63-8475 authorize the irrigation of a combined total of 105 acres, due to the overlap of the water rights.

Water Right No. 63-8475

Water right 63-8475 authorizes diversions from the two groundwater wells located in the NESE, Section 25, Township 3N, Range 4W, and diversions from a third well in Government Lot 1, Section 30, Township 3N, Range 3W (Wells A, B and C on Figure 3). The maximum diversion rate authorized from the wells by water right 63-8475 is 1.05 cfs (approximately 470 gpm). Water rights 63-2798 and 63-8475 authorize the irrigation of a combined total of 105 acres, due to the overlap of the water rights.

Water Right No. 63-31820

Water right 63-31820 authorizes diversions from the groundwater well located in Government Lot 1, Section 30, Township 3N, Range 3W (Well A on Figure 3). The maximum diversion rate authorized from the well by water right 63-31820 is 1.05 cfs (approximately 470 gpm). Water rights 63-2798 and 63-31820 authorize the irrigation of a combined total of 111 acres, due to the overlap of the water rights.

¹ The water right acreages in Table 1 are not additive due to the overlapping areas of the rights. Although the total area shown in Table 1 is 186 acres, the irrigated area authorized is less than the total.

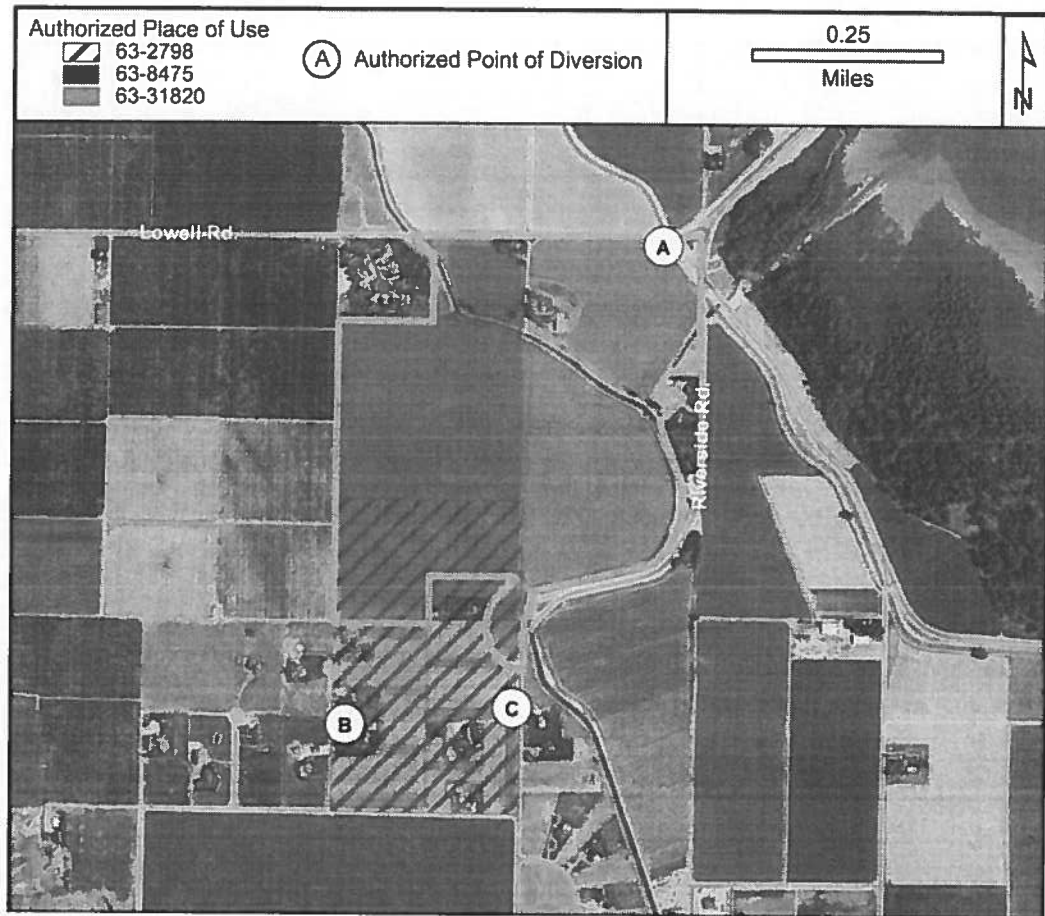

Figure 3. Water Right Location

3. DISTRIBUTION OF THE HOCKBERGER WATER RIGHTS

Water Rights for Land Areas 1, 2, and 3

Land in Idaho is generally sold "with appurtenances", which includes any appurtenant water rights. Table 2 summarizes the water rights appurtenant to each land area shown in Figure 3 (Area 4 does not have appurtenant water rights). The water rights will be split as indicated in Table 2, unless land conveyance deeds (or other instruments) specifically describe the rights differently.

Table 2. Water Rights Appurtenant to Specific Land Areas

Water Right No.	Area 1 - Orchard		Area 2 - Vinecrest		Area 3 - Development	
	Area (ac)	Diversion Rate (cfs)	Area (ac)	Diversion Rate (cfs)	Area (ac)	Diversion Rate (cfs)
63-31820	20.0	0.375	10.0	0.188	26.0	0.488
63-2798	20.0	0.215	42.6	0.459	2.4	0.026
63-8475	60.0	0.969	3.8	0.061	1.2	0.019
TOTAL	80.0	1.560	42.6	0.708	28.4	0.533
Note: Total area is not additive due to overlapping water rights. Total areas shown are the maximum number of acres that can be irrigated in each of the three areas using appurtenant water rights.						

Specifically, we understand the Orchard area is comprised of 88.48 acres. However, only 80 acres of the combined water rights are currently appurtenant to the Orchard area. It would be extremely unusual for a farm to irrigate 100% of its land (shops, implement yards and farm roads are not irrigated). Eighty acres of irrigation may be sufficient for the Orchard; likely it depends on the negotiated contract between the Estate and the buyer.

Similarly, the individual lot owners in Vinecrest will not irrigate "roads and rooftops" in the subdivision. Although 42.6 acres of combined water rights are available for irrigation of Vinecrest, the Estate has control of those rights and can distribute the rights as it chooses. Mr. McAllister has suggested no more than 2 acres of combined water right would be conveyed to each lot owner (for a total of 18 acres). The residual rights could be sold or conveyed to others, or placed in the Idaho Water Supply Bank for future use.

We assume the entire 28.4 acres of combined water right will be conveyed for development of Land Area 3.

Land Area 4

Land Area 4 will be conveyed to Jack Hockberger. The area is comprised of two residential lots, each of which is less than one acre in area. There are currently no appurtenant groundwater rights, but there are several options for obtaining water rights for the lots in Land Area 4. These options include:

1. Obtain a well driller's permit and construct a domestic well on each lot. A recorded water right is not required for a domestic use that meets the definition in Idaho Code § 42-111. For single-family homes, domestic use includes use in the home and irrigation of up to ½-acre.
2. File an *Application for Permit* with the Idaho Department of Water Resources to develop a recorded water right for each lot. This option would be completed in addition to Option 1, and would confirm the additional value provided when water rights are clearly appurtenant to the lots.
3. Obtain a small portion of one of the Hockberger rights for each lot by conveyance from the Estate.

4. RECOMMENDATIONS

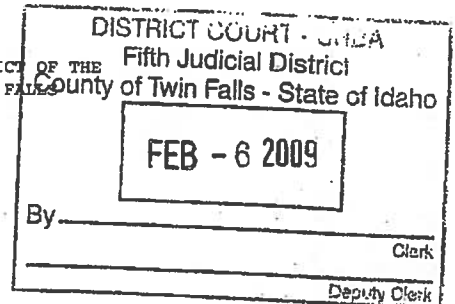

We recommend the Estate decide as soon as possible how the water rights will be divided. The following options should be considered (and we suggest the decisions are made in this order):

1. Determine the specific number of combined water right acres to be conveyed with the Orchard property. We recommend a special water right conveyance deed if the number of acres is greater than the 80 acres currently appurtenant to the Orchard parcel.
2. Determine the number of combined water right acres to be conveyed to each of the lot owners in Vinecrest No. 2. Hockberger specifically withheld the rights when the lots were sold; a special water right deed can be prepared for each conveyance.
3. Determine the number of water right acres to be conveyed to the Development. We recommend a special water right conveyance deed if the number of acres are more or less than the 28.4 combined acres currently appurtenant to the Orchard parcel.
4. Determine whether the Estate will convey water rights to Jack Hockberger for his use on lots in Area 4. A special water right deed can be prepared for this conveyance.

SPF would be happy to help the Estate describe the portions of the Hockberger water rights after the determinations outlined above are complete. No further action is required for the Orchard and Development areas if the lands are conveyed with appurtenant water rights.

Water Right License

WATER RIGHT NO. 63-08475

5. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
6. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
7. This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Original: Water Right No. 63-31820

Split into: Water Right No. **63-34190**

Dear Water Right Holder:

We have received and processed a Change of Ownership for a portion of the original Water Right as referenced above. This Change of Ownership required a split of the original water right.

When a portion of the original water right has been conveyed to another, a new water right number is created to represent the portion obtained by the new owners. For your records a poof report and map depicting the place of use (POU) and the point of diversion (POD) for Water Right No's **63-34178, 63-34189, and 63-34190** are enclosed. Please refer to your new water right number when corresponding with our office.

The Department recently processed a number of ownership changes for portions of right 63-2798, 63-8475, and 63-31820 in your area. This process altered conditions on your portion(s) of the right(s). Please disregard any previous notification you may have received regarding the ownership change process and/or transfer process. Enclosed is a copy of your water right record(s) and map(s) depicting the POU and POD as it currently exists.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing an ownership change notice, the Department does not review the history of water use to determine if the right has been forfeited through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Sections 42-222 and 42-223, Idaho Code.

Your portion of this water right has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form or you can find the forms at www.idwr.idaho.gov. If you do not plan on changing any items on your water right, then no further action is required at this time.

Thank you for your patience, as we have had several water right changes to process. If you have any questions concerning the enclosed information or this letter, please feel free to contact this office at 208-334-2190.

Sincerely,

Rachel Sommer
