

MEMORANDUM

Date: April 4, 2018
To: Transfer 82135
From: James Cefalo
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to change the point of diversion for water right 35-7261A.

Authority to File:

The applicant, Jeanine Landon, is the current owner of record for the water right. Bonneville County taxlot data confirms that the applicant is the owner of the current POU and proposed POD.

Water Right Validity:

The right included in this transfer was decreed in the SRBA on 4/2/2002. Water right covers the entirety of the property. A home, garage, storage bins and driveway have been in place for more than 30 years. These hardened acres have not been irrigated at all since the 2002 decree. Water right will be reduced by 0.7 acres and 2.8 acre-feet to account for the acres that have not been and cannot be irrigated. Applicant's representative, Brad Landon, was notified of the reduction and agreed that the hardened acres have not been irrigated. All of the remaining 2.7 acres have been irrigated since 2002.

Injury to Other Water Rights:

Other rights will not be injured by the proposed change. The point of diversion is being moved to a well located within the place of use. No ESPA model simulation required since the proposed point of diversion and existing point of diversion are within an adjacent model cells. The transfer was advertised and no protests were received. The watermaster reviewed the transfer, and did not oppose its approval.

Enlargement of Use:

The proposed change will not result in enlargement of the water right.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
