Date: 3/22/2018

Re: Explanation of overlap review with permit 98-7865

This memorandum is being written to explain the overlap review while licensing permit 98-7865.

A field exam was performed on permit 98-7865 on 7/12/2017. During licensing review it was found that there was an overlap with license 98-7628. A phone call was placed to Dennis Ponsness on 3/19/18 to discuss the water usage for the Trow Creek Water Assn on his property and if there was any current use. He explained that when he had his well drilled on 9/29/2004 (D0035457) he disconnected his service line from Trow Creek Water Assn and ended his membership in the Assn. Because there has been almost 14 years of non-use on the property it can be considered forfeited and thus no overlap is needed. This memorandum will be added to the water right file in case of any future inquires or a possible adjudication in basin 98.
