RE: Application for Transfer of Water Right 35-7837D

Mr. Jay Van Orden:

I am in the process of reviewing your transfer application for water right 35-7837D for approval.

Your application has gone through advertising, and no protests were received. Through the review, it has been found that additional documentation is required in order to continue with the approval.

Required Documents:

A **Well Easement Agreement** is required, giving you access to the proposed well located on Mr. Jim Christiansen's property.

I discussed getting a well easement agreement before the advertising with you over the phone, but never received it. Now we need one signed and in place, granting you legal access to the well in order to approve this transfer.

Because IDWR cannot process the approval of this transfer without the required documents, we will hold any further action for 30 days pending required document submittal. If we do not receive the necessary information within the 30 days, or by **Monday, March, 5th 2018**, the department maybe void and return your application.

Please let me know if you have any questions or concerns.

Sincerely,

Scott Stosich
Water Rights Agent
