ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The use of water for irrigation under this right may continue to as late as October 31, provided other elements of the right are not exceeded. The use of water after October 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

MEMORANDUM

To: Water Right No. 22-14027

From: Rachael Smith, Water Resource Agent Sr.

Date: February 2, 2018

Re: Water Supply Bank Lease Application 1002

PURPOSE/NARRATIVE: On January 26, 2018 the Department received a Water Supply Bank (WSB) application for water right 22-14027 from Rocky Mountain Environmental Associates on behalf of Gary and Shannon Summers. This is a groundwater irrigation right with a diversion rate of 0.06 cfs and an annual diversion volume of 14.4 af. The applicant requested lease of the entire right.

The point of diversion (POD) is located within the NWNE corner of Section 12 T05N R45E in Teton County and the place of use (POU) is located within the SENW corner of Section 12 T05N R45E. Two taxlots are associated with the POU for a total of 4.8 acres. The unrecorded domestic use is located on the applicant's lot and is part of the total 4.8 acres.

AUTHORITY TO FILE: Gary and Shannon Summers signed the lease application and are owners of the water right. There are no concerns about authority to file the application.

WATER RIGHT VALIDITY/FORFEITURE EVALUATION: The parent right 22-12527 was decreed in the Snake River Basin Adjudication in 2008. The right was then split and this right was leased to the WSB from 2013-2017. There are no concerns of forfeiture.

ENLARGEMENT OF USE: An analysis of POU overlap shows overlap with Grand Teton Canal Company. The applicant owns 20 shares of the Grand Teton Canal Company, but the application states that the shares have not been used on this property since selling the lots of the subdivision beginning in the 1980s. None of these shares will be used to irrigate the POU that is being placed in the WSB.

Current satellite imagery shows construction of a house and approximately 0.1 irrigated acres. The domestic groundwater well is an overlapping unrecorded domestic use. The entire 4.8 acres of the right will be accepted into the bank, but because 0.5 acres may be irrigated under domestic use, only 4.3 acres will be rentable to prevent enlargement of water use.

POD overlap exists with water rights 22-14026 and 22-14133.

There are no combined limits on the water right that is being leased to the Bank.

LOCAL PUBLIC INTEREST: There is no information that suggests this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The maximum diversion rate associated with lease application 1002 shall be 0.01 cfs/ac which is consistent with the conservation of water resources and irrigation practices in Idaho.

DEPARTMENT/WATERMASTER: The leased right is not subject to any Water District. This lease is within Teton County. Comments were requested from IDWR's Eastern Region office and there were no comments or concerns about the lease.

WATER SUPPLY BANK EVALUATION: It is recommended that this lease is approved for 4.8 acres and that 4.3 acres are rentable.
