RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.

3. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
4. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
5. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
6. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date. This rental for mitigation by non use may be ineffective if the mitigating water right is not in priority.
7. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
8. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 71.
9. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the department from all authorized points of diversion which will allow determination of the total rate of diversion.
10. Diversion of groundwater is limited to those times water is available for diversion under this right and priority from the Alturas Lake Creek.
11. The right holder shall comply with all fish screening requirements of the Idaho Department of Fish and Game.
12. Right Nos. 71-64A and 71-69 when combined shall not exceed a total annual diversion volume of 435.0 af for the irrigation of 145.0 total acres.
13. This rental agreement does not authorize the construction of a well.
14. The use of water for irrigation under this right may begin as early as May 1 and may continue to as late as October 31, provided other elements of the right are not exceeded. The use of water after September 30 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. Re: Review/Analysis for Application to Lease / Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On December 21, 2017, Katie Breckenridge submitted lease and rental applications on behalf of the Breckenridge Family Ltd. Part. The applications propose to lease all of both rights to the bank from 2018 through 2022 inclusive. Both rights were leased indefinitely into the bank in 2009. These leases expired at the end of 2017.

The Breckenridges purpose to rent their own water rights at the authorized place of use for irrigation purposes. An imagery review does not show evidence of irrigation over the past several years. They want to protect their water right and use the water if they need to irrigate.

AUTHORITY TO FILE: Katie Breckenridge, General Partner of Breckenridge Family LTD Partnership (Partnership) signed both applications. According to the June 2017, Blaine County parcel data the Partnership owns some of the place of use. Other parcels belong to Susan G Breckenridge and the Breckenridge John H-Trustee Breckenridge Family Trust. On January 17, 2018, I requested authorization for the other two properties. On January 22, 2018, the Department received warranty deeds conveying land to both the Breckenridge Family Trust and Susan Breckenridge. Both warranty deeds reserved all water rights to the Partnership.

WATER RIGHT VALIDITY: Both water rights were decreed in 1999. They were indefinitely leased to the bank in 2009 and have been protected from forfeiture during that time. The indefinite lease expired in December 2017.

INJURY TO OTHER WATER RIGHTS: Because the rental and lease place of use and point of diversion are the same as the rental place of use and point of diversion no injury is expected.

ENLARGEMENT OF USE: There are no enlargement issues.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: Southern region had no concerns. The watermaster did not send comments.
