RE: Water Right Permits No. 63-32911, 63-32912, and 63-32467

Dear Permit Holder(s):

The Idaho Department of Water Resources (Department) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

The examiner who verified your water use reported that certain elements of the permit has been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, additional points of diversion were actually developed and some of the legal descriptions needed to be corrected. These amendments make the corrections recommended by the field examiner.

The enclosed Application for Amendment forms depict the elements of the water rights as they will appear on the individual licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please sign and return the forms with the \$100.00 filing fee per form for a total required fee of \$300.00 within 14 days or by March 14, 2018.

If you have any questions, please don't hesitate to contact me.

Sincerely,

Daniel A. Nelson
