Subject: RE: Transfer Application (and now WSB rental application)

Hello all,

I have updated the POU shapes for 61-12269 and 61-12290 based on the shapefiles submitted by Mr. Sullivan in the email below.

Jean, please print this email string and file it with these water rights so we have a record that we changed the shapes and the user complied with condition 206.

Thanks,

Nick.

Nick and Angie,

See the attached shape files for 61-12269 and 61-12290.

Greg Sullivan

Subject: FW: Transfer Application (and now WSB rental application)

Rachael,

I do not oppose the rental, but I want to note that it appears the rental and a recent transfer application contemplate shifting the specific 291.5 acres irrigated under water rights 61-12269 and 61-12290. Those water rights bear the following two conditions:

- This right is limited to the irrigation of a specific 126.0 [or 165.5] acres within the 468.0 acre place of use authorized by this right in a single irrigation season. The specific 126.0 [or 165.5] acres to be irrigated by the right holder are shown in the electronic shape file associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 126.0 [or 165.5] acres to be irrigated within the 468.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
- Rights 61-12269 and 61-12290 when combined shall not exceed the irrigation of 291.5 acres.

This rental appears to overlap with the 126 acres currently in the Department's shape file for 61-12269, while no rental or water right appears to authorize irrigation of approximately 80 acres of a pivot in the SE ¼ of section 19. The water user should submit a new GIS shape file to reflect the use of 61-12269 and 61-12290 as they are proposed to be used with this rental.

Nick.

Nick,

Attached are the review memo and map for Tiegs' WSB rental of water right 61-2162. Please let me know if you have any comments, questions or concerns.

Thank you,

Rachael

We just got the transfer yesterday and haven't data entered it yet. If Tiegs is looking for water to use in the next month or so, we probably wouldn't have the transfer processed by then.

Does that help?

Hi Nick,

If Angie is out through the weekend, would you be able to look into this? Brockway Engineering is pushing for this Water Supply Bank rental to be processed, but they said a transfer application was submitted for the same use. Do you know how far along things are for the transfer? The owner is Frank Tiegs and the transfer is for 86.6 acres within basin 61.

Thank you,
Rachael

Subject: Transfer Application

Hi Angie,

I have a water supply bank rental application from Frank Tiegs in basin 61. The application says that he has applied for a transfer for the same location at the POU for water right 61-12269. Do you know how far along things are in processing the transfer application? I've been told that we shouldn't process a water supply bank rental concurrently with a transfer for the same POU unless the timing really does not line up so I thought I'd ask.

Thank you,
Rachael
