RE: Ownership of Water Right Permit 37-8856

Dear Mr. Anderson:

On October 15, 2014, I visited with you to conduct a beneficial use field examination of the water use authorized by the above referenced water right permit. As we discussed at that time, the permit covers both your water use and well plus the water use and well for the Walters Ready Mix, Inc. ("Walters") facility. It is my understanding, based on examination of both your water system and the Walters' water system, that the two systems are separate and used on separately owned parcels. These parcels were owned together at one time by Heath-Marshall, Inc., the current owner of record of the water permit.

When a change of ownership involving a water right occurs, a Notice of Change in Water Right Ownership form is required. I have enclosed a copy of this form for your convenience. This form will update water right ownership information as well as split the existing water right permit between you and Walters, creating separate permits for your individual uses.

Please return the completed form along with the required support documentation and fee to my attention. Upon receipt of this information, I will see that our records are updated. Please note that both you and Walters will each need to submit a change in ownership form. However, if the forms are submitted together, only one fee of \$100 is required for the two forms. I would recommend this approach and working with Walters to split the cost of the fee.

If you have any questions regarding this matter, please call me at 208-287-4959.

Sincerely,

Tim Luke
Water Compliance Bureau
