ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.

WATER SUPPLY BANK LEASE CONTRACT No. 741

9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Basin 65 general provisions No. 3, the separate streams general provision, does not apply to appropriations of water after October 18, 1977. This water right shall be administered as being from a separate source pursuant to Basin 65 general provision No. 3. If the holder of this right seeks to change the right pursuant to Idaho code § 42-222 or successor statute, nothing in this general provision shall preclude any other person or entity from demonstrating that such change in use would cause injury to its water right or from receiving any relief provided by law in the event of injury.
13. Use of leased portions of Right Nos. 65-3222 and Right No. 65-8290 when combined shall not exceed the irrigation of a combined total of 38.2 acres in a single irrigation season.
14. Use of unleased portions of Right Nos. 65-3222 with Right No. 65-8290 when combined shall not exceed the irrigation of a combined total of 122.8 acres in a single irrigation season.

Mr. Connally,

Thank you again for providing the additional information I requested in

regard to your calculations on the water supply bank lease applications for 65-3222 & 65-8290. I have reviewed the spreadsheet, and as I suspected, portions of these calculations included water right 65-3223. This is not an issue for your lease proposal, but I wanted to take this opportunity to give you information from our system, so you will further understand your water rights.

I have attached a map, which shows the water rights by QQ (quarter quarter), and further shows approximate acres worth of water right per lot, as well as the proof reports for all three irrigation water rights covering the subdivision. On the proof reports, you will see under water rights 65-3222 & 65-8290 you have a combined acre limit of 161 acres. (This is why I asked how you arrived at 176.33 acres.) The proof report also gives the acres per QQ, and in two cases, the taxlot specifically. I also used the overlay map I created to calculate the acres for the requested idled lots, and came up slightly lower, which is also attached.

The offered water rights as decreed, and the proposed attachment 2 calculations as follows:

	Diversion Rate (cfs)	Volume (ac)	Acres (ac)	Leased rate (cfs)	Leased volume (ac)	Leased acres (ac)
65-3222	2.90	Not stated	161	0.69	133.7	38.2
65-8290	0.32	Not stated	161	0.08	133.7	38.2
Combined	3.22	Not stated	161	0.77	133.7	38.2

You have an additional 34 acres under water right 65-3223, which only covers the south part of the PTR subdivision, and does not overlap with the other two water rights. This water right was previously leased to the bank, but I did not see an application to put it in again. IF the area covered by this water right (by legal place of use description on the proof report) is NOT being irrigated, I would recommend you apply to place it back in the bank to avoid forfeiture.

Please let me know if I can move forward with the proposed acres and rates, or if you would prefer to use the 38.3 acres (nominal).

Best,

Mary
