

MEMORANDUM

TO: Water Right Permit File 84-7247

FROM: Daniel A. Nelson

DATE: February 6, 2018

SUBJECT: Field Exam Needed

An attempt was made to perform an in-house examination of this permit. Unfortunately, there were simply too many uses and not enough adequate information to perform an in-house field examination on this permit. It has been recommended that a field examination be done on this permit to ensure all of the uses have been developed.
