The right holder may divert ground water under this right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Section 42-222, Idaho Code, or other Department approval.
12. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than June 29, 2005.
13. This right does not grant any right-of-way or easement across the land of another.

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

Date: January 9, 2018
To: Transfer 82012 File
From: Bill Mills
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes creating a 4130 acre permissible place of use (PPU) for 6 irrigation ground water rights (45-2320; 45-2443; 45-4102; 45-13642; 45-13910 and 45-13914), one Snake River right (01-7072), one right diverted from an unnamed stream (45-2326) and one waste water right (45-13644) for a total 30.76 cfs that will be limited to the irrigation of 2233.7 acres from 2018 to 2020 and then limited to the irrigation of 2254.7 acres in 2021 and beyond. There will be no changes to the points of diversion (PODs). The Snake River right is diverted approximately 7.8 miles east and 1.9 miles north of Murtaugh. The PPU and remainder of PODs are located approximately 2.9 to 7.5 miles east and 0.6 to 5.2 miles south of Murtaugh.

The transferred rights overlap with water right 45-2746 owned by J.R. Simplot Co. whom withheld this water right when the land was sold to the current owner and they have yet to transfer it to new ground. The right is leased to the water supply bank until the end of 2021 and is not in use by the current land owner. Additionally, the east half of the PPU is within both the Oakley Canal Co. and Southwest Irrigation District's service areas. All but one of the PODs and the PPU are located in Water District 140. The other POD is located in Water District 01. Watermaster comments were solicited from both water districts. See email in file dated 12/26/2017 for Watermaster 01's comments regarding this transfer application.

The applicant's representative has provided an electronic shape file and a "206" map for the 2233.7 acres the applicant is seeking to irrigate within the 4130 acre PPU during the 2018 irrigation season.

- **Authority to File:** IDWR records indicate the applicant currently owns all water rights and properties involved in the transfer.
- **Water Right Validity:** Water rights 45-2320 and 45-2326 were decreed in the SRBA on 5/6/2005. Water Rights 45-13642, 45-13644 and 45-13910 were decreed in the SRBA on 5/13/2005. Water Rights 45-2443, 45-4102 and 45-13914 were decreed in the SRBA on 6/29/2005. Water right 01-7072 was decreed in the SRBA on 5/22/2013. Recent aerial photography indicates that the properties associated with this transfer appear irrigated.
- **Injury to Other Water Rights:**
None anticipated.

- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated.
- **Effect on Agricultural Base of the Local Economy:**
None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing

Subject: RE: Comment Letter for T#82026 - Double Eagle Properties

Denise,

Here are comments are submitted by the WD1 Watermaster and staff.

- 1) The PPU is crossing jurisdictional water district boundaries and is proposing to combine PPU of acres within both water districts. This type of PPU should not be allowed, because it creates conflicts between the varying limited water supplies which would go well beyond the supplemental purpose the water rights intended. PPU's would need to be limited to within the boundary of established water districts. In this case PPU's for two or three PPU's could be created with separate jurisdictions, but an all-compassing PPU as proposed would not work.
- 2) Only one of the nine water rights listed in Transfer #82026 is within WD1. Water Right 1-7072 is diverted at Milner Irrigation District with a flow rate of 1.54 cfs and a volume limitation of 751.4 AF to irrigate 1647 acres. The remaining eight water rights have varying places-of-use either groundwater or tributaries not regulated by WD01.
- 3) 1.54 cfs would be an insufficient water supply to provide 751.4 AF in many years and would be substantially below the amount of water needed to irrigate 1647 acres. The transfer does state the applicant has shares of Artesian and Palisades Water User storage, but the amount of shares or storage is not specified in the transfer. The amount of shares should be identified and assigned to the Milner Irrigation prior to completing the transfer.
- 4) The amount of shares of Artesian and Palisades Water User storage would need to be identified prior to the irrigation season in order to allow the WD1 watermaster to assign water. The identification of shares and number of shares would be required each and every year thereafter.
- 5) Transfer #82026 proposes a new permissible place-of-use (PPU) for water right 1-7072 and the other eight water rights expanded to 4,130 acres without changing the flow rate or volume limitations of 1-7072. A comment in the transfer application indicates the PPU area shall be limited to 2,233.7 acres in the years 2007-2020, and limited to 2,254.7 acres from the year 2021 thereafter. A list of acres being irrigated and a map should be submitted to the Watermaster of WD140 each year to ensure the correct acres are irrigated within that year's PPU.
- 6) An accurate magnetic meter and records of water delivered from surface water into a groundwater system would be required at every connection between surface and groundwater supplies. Daily diversion data records of water delivered from surface water supplies to groundwater diversions submitted by the applicant to the WD140 watermaster.
- 7) Mitigation of water calls between groundwater and surface water caused by a large combined PPU should be addressed prior to approval of this transfer.
- 8) Storage water used from Artesian or Palisades Water Users may be subject to a last-to-fill penalty in the following years.
