Subject: Idaho Water Permit: 84-12285

Dear Permit Holders:
DAN FUGATE
CAROLYNN FUGATE

Permit Number: 84-12285

This is a 120 day courtesy reminder.

IMPORTANT: A response from you is required to maintain the active status of the referenced water right permit.

If no response is received from you, the permit will lapse and your authorization to develop and/or use this water right will be cancelled.

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before **5/1/2018**.

The proof statement must be accompanied by either the appropriate license examination fee or a field examination report prepared by a certified water right examiner.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been delayed by a government agency or by litigation that brings title to the water in question, an extension of time may be granted if appropriate documentation is provided at the time of filing. An extension request must be accompanied by a \$50.00 filing fee and signed by the appropriate authorized permit holder(s) or authorized representative with a power of attorney.

Proof of Beneficial Use and Request for Extension of Time forms are available from any department office or at the department's website at www.idwr.idaho.gov.

Either an acceptable proof or an acceptable extension request must be received by this department on or before the above proof due date. If neither is received, the department will send you a lapse notice and the permit will no longer be of any force or effect.

Sincerely,

Dan,
Your permit also allows for domestic use of one home from the spring. If the stock has been watered, and the house has water use for domestic purposes then you are done. If you have watered the stock from the spring and have no plans to use the water for domestic purposes of one home from the spring, then you can consider to be done with the project and file the statement of completion. If you have used the water from the spring for the stock and one home, again you can consider the project done and file the statement of completion.

If you need more time because you plan to build the home and use the water for domestic purposes you could file the request for extension of time for 3 more years. The 3 years will allow you to meet the initial 5 year development period allowed, which would then make it so that you could file another extension later for up to 5 more years.

I wish you would call me if you still have questions.

Sincerely,

*Darla Block

Darla,

I received the form and instructions. I guess my question is how to know what all needs to be done for my project with the water to be complete. I have diverted the water into a holding tank for the stock. I am not planning on doing much more to it. I have to adjust it in the spring because it lays in a draw in which the spring runoff runs over it. If hoses and piping to the tank is good for completion I will send in that form. If not I need to know what else I need to do to it and will then send in the Extension form. If you could please help me on this matter that would be great!

Thank You Very Much

Dan,

I sent the forms & instructions with the Statement of Completion Due Notice to you in the mail on the 8th of March. But in case you did not receive them go to our website www.idwr.idaho.gov go to forms, then from there all the way down to water right forms. Once you get to water right forms, the second title down will be Beneficial Use. Under that you will find the Statement of Completion form & Instructions, and the Request for Extension of Time form & instructions. Please call me if you have a question. Only use one form or the other. Statement of Completion form if all the development is done and the water has been put to fill beneficial use. Extension of time form if you need more time to complete the development of the project and put the water to actual use according to the uses listed on your permit to appropriate water.

Sincerely,

Darla,

I was wondering what exactly I need to do to prove the beneficial use. I looked on your website but could not find the form for beneficial use on there.

Please let me know what I need to do so that our water rights are not cancelled.

Thank you Very Much!
