

MEMORANDUM

TO: Water Right File – 65-13317
FROM: Aaron Skinner – Water Resource Agent
DATE: December 20, 2017
SUBJECT: Field Exam Review

This water right permit was approved on August 21, 1991 for irrigating 0.5 acres. A field exam was completed by Department staff on November 19, 1993. I have reviewed the field exam and find the document complete and accurate. The field exam calculated a theoretical rate of 1.5 cfs, which exceeded the limits of the permit. The permitted rate of 0.02 cfs will be recommended for license. Because the source is a natural stream and volume limits are not required per IDAPA 37.03.02.035.j.

My review of the documentation supplied with the field exam is as follows:

Ownership: Currently, Gem County parcel data suggest the property owner to be Ronald Myers. A letter was sent to the permit owner's, Marilyn Cunningham, PO Box and property address to initiate an ownership change and better understand the diversion rate. No response was received by the department. Because there are no necessary amendments and developed use was verified through a field exam, recommendations will be forwarded to licensing. **If the current property owner has interest in this right, an ownership change form will need to be submitted.**

Source, POU, POD: The DRG layer in ArcMap was used to confirm the source as Little Cottonwood Creek, a tributary of Squaw Creek. Two PODs locations were put on the permit because one single POD was on or near the line between the SWSW and NWSW of Section 10, Township 08N, Range 01E. Reading through Mr. Lester's field exam notes, system diagram, and current Google Earth imagery, it's determined that only the SWSW POD should be recommended for licensing. The place of use was determined to fall around the house and backyard. This was confirmed using Google Earth imagery and field exam pictures/notes.

Diversion rate and Volume: Although water measurements were not obtained during the field exam, ditch capacity and theoretical analysis were completed. Calculations seem justified to recommend 0.02 cfs. Based on the small diversion and a place of use less than 5 acres, the permit qualifies for an in-office field exam and no discharge measurement is required. According to IDAPA 37.03.02.035.j.iii, volume recommendations for natural streams are not required. As such, a volume limit will not be suggested for licensing.

Overlap Review: Some of the overlap that was present for the 1993 analysis do not currently exist. WR No. 65-3045X was a parent right that has since split into 65-23366, 65-23367, and 65-23368. They don't overlap with this rights POD as the source for those rights is Squaw Creek. No other POD overlap exists. The POU analysis noted WR No. 65-12522 as POU overlap, but is on the east side of the Sweet Ola Hwy and not pertinent to this right. WR No. 65-18773 is a domestic use for the same parcel as this right. Exam notes explain the surface use is auxiliary to the well when the well is having problems. Combine use limits are already on the permit, so no further action is necessary.

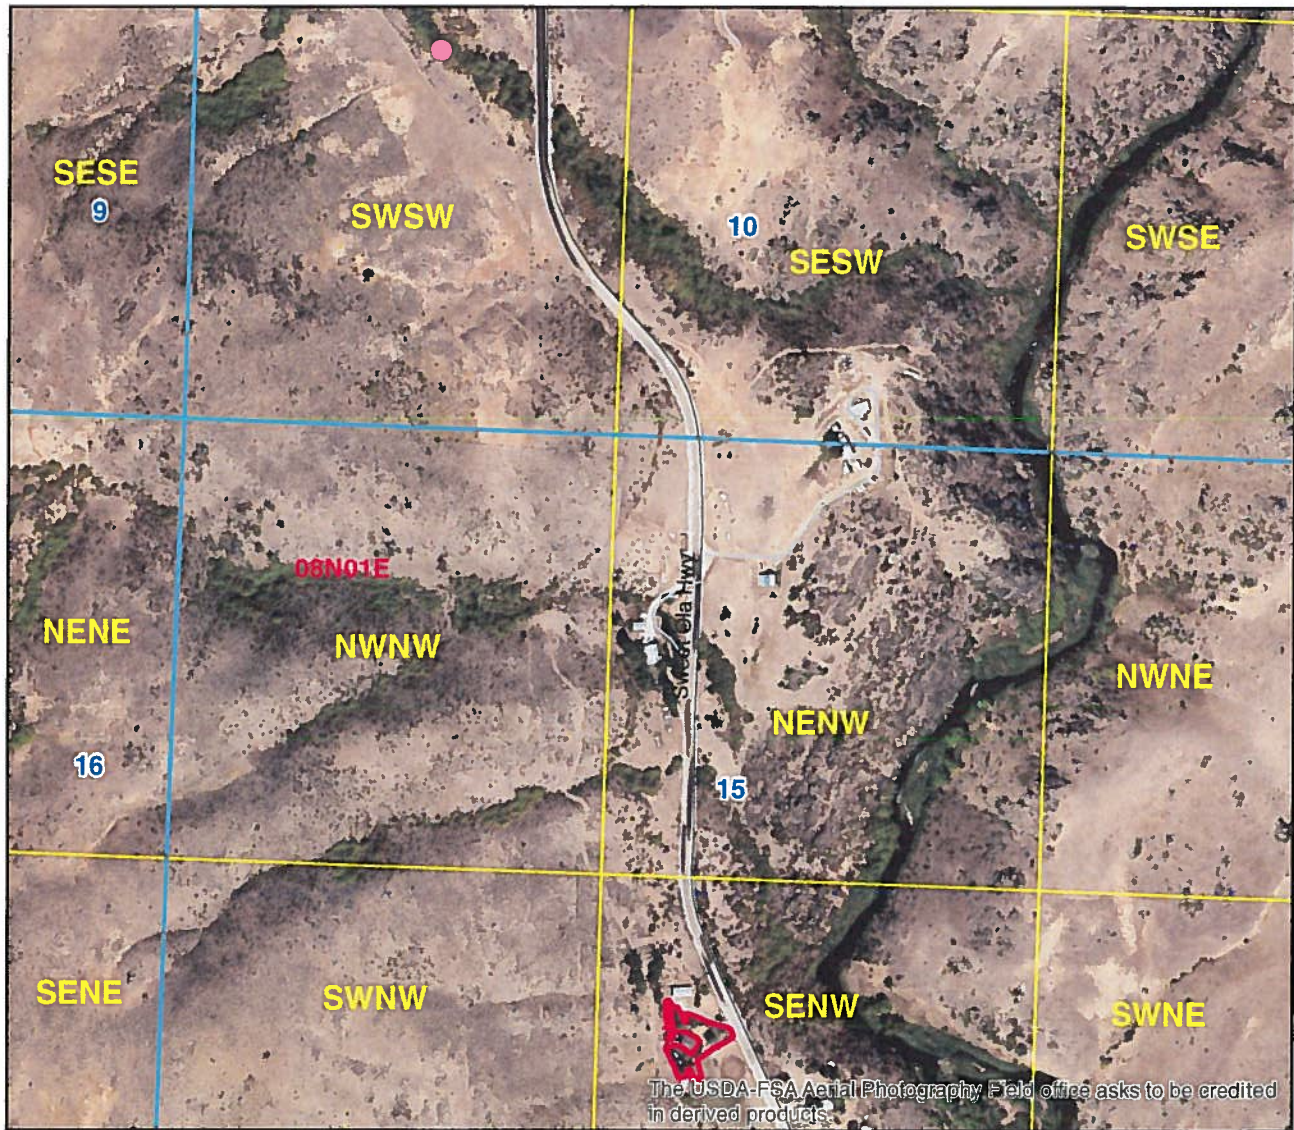

Conditions: Conditions 005 and 060 were updated to R05 and X31 respectively and forwarded to licensing. The single point of diversion language was removed and not forwarded to licensing since clarification of the location was received during the field exam.

RE: Scheduling Field Exam for Water Right Permit No. 65-13317

Dear Permit Holder:

We are planning to conduct water right examinations in the vicinity of the above-referenced permit **this season**. An examination is needed to verify the water use in order to issue a water right license.

The above-referenced permit authorizes **0.02 cfs of LITTLE COTTONWOOD CREEK** for **IRRIGATION** use. **If you have developed a beneficial use and still own the place of use property, please contact me at your earliest convenience to schedule an examination.**

If you did not develop a beneficial use of water under the permit during the beneficial use period, a license cannot be issued and the permit should be relinquished. If that use was developed, but have ceased using the water and you currently carry no interest in it, please relinquish the permit by submitting the enclosed Relinquishment of Permit form (no fee required).

If you did develop a beneficial use of water under the permit, but you no longer own the place of use property identified in the permit, please submit the enclosed Assignment of Permit form with the applicable \$25 processing fee.

Please contact me by December 20, 2017 at (208) 334-2190 to either schedule an examination or submit a relinquishment or assignment form. If you no longer own the place of use property and/or do not respond to this letter, the department will work with the current property owner to issue a license or void the permit.

Sincerely,

Aaron Skinner
Water Resource Agent

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
NONE						

2. Measurements: NO MEAS. POSSIBLE THIS TIME OF YEAR (ditch not used at this point in year).

Ditch size @ P/O 2 1/2' x 3/4' est. velocity ≈ 5 ft/s. based on slope *

" " P/O 1 1/2' x 3/4' " " ≈ 2 " " "

* Basing velocity & slope estimates on previous experience, other ditch measurements

E. NARRATIVE/REMARKS/COMMENTS

Rock & plastic div. dam on creek diverts water to earth ditch. Ditch runs about 1/2 mile before ending at P/U.

A break is made in ditch at P/U to allow flood irrigation of garden, yard, & fruit ~~for~~ trees. Also, garden hoses can be fed from this break to direct water to specific sites.

Although can't measure flow in ditch or amount withdrawn from ditch since not in use ~~at~~ during exam (conducted after irrig. season over), it's obvious that permit water can be delivered by this ditch.

A rough estimate of ditch capacity can be made without surveying equipment (to conduct Mannings ditch measurement).

Estimated capacity:

average ditch	width	= 2'
" "	depth	= 3/4'
" "	velocity	= 3.5 ft/s

$$Q = VA = (3.5 \text{ ft/s})(2')(0.75') = 5.25 \text{ cfs}$$

(EVEN AT velocity of 1 ft/s, $Q = 1.5 \text{ cfs}$, greatly exceeds permit needs)

Have conditions of permit approval been met? ☒ yes ☐ no

NO watermaster controls in place but not specifically required (or needed) by conditions. Still shall remain subject to WRM control.

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method:

*allow .02 cfs per narrative***G. VOLUME CALCULATIONS**

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \frac{(.5)(4.5)}{1} = 2.25 = 2.3$$
$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \frac{(.02)(246)(1.9835)}{1} = 9.8$$
$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 2.3$$

2. Volume Calculations for Other Uses:

FIELD EXAM NOTICE

RE: PERMIT NO. 65-13317

Dear Permit Holder:

An agent from the Department must conduct an examination on the above-referenced permit before your water rights license can be granted. In order to conduct this exam as efficiently as possible, we ask that you contact the water rights examiner listed below before July 30 to schedule a day and time convenient for you.

Please be advised that you will need to operate your system under normal conditions during the examination.

If there is a problem with scheduling or conducting the examination at this time, please call and other arrangements can be made.

Sincerely,

A handwritten signature in cursive script that reads "Rick Collingwood".

Rick Collingwood
Water Rights Examiner

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-13317

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Nina Shields
Secretary/Records Manager
