

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 197

This is to certify that:

IDAHO WATER RESOURCE BOARD
322 E FRONT ST PO BOX 83720
BOISE, ID 83720-0098

RECEIVED

DEC 04 2017

DEPARTMENT OF
WATER RESOURCES

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)
71-10975	5/1/1910	MEADOW CREEK	0.030	Not Stated	3.20
71-10977	5/1/1910	MEADOW CREEK	0.010	Not Stated	3.20
71-10976	7/1/1910	MEADOW CREEK	0.060	Not Stated	3.20
71-10978	7/1/1910	MEADOW CREEK	0.040	Not Stated	3.20
Combined Limit Totals			0.140	Not Stated	3.20
Combined Rental Totals			0.140	Not Stated	3.20

Term of Rental: This rental shall take effect when all parties have signed it and shall continue in effect indefinitely. The term of rental for this rental agreement shall be subject to review and reaffirmation every 100 years, with the first review possible after December 31, 2116.

Annual Rental Fee: Subject to a resolution of the Idaho Water Resource Board dated May 19, 2017, there shall be a single rental payment of one thousand, four hundred, thirty five dollars and fifteen cents (\$1,435.15) to cover administrative fees associated with administration of this rental agreement. No rental payments will be disbursed to the water right lessor.

Total Water Use Authorized Under Rental Agreement

Beneficial Use	Diversion Rate (CFS)	Diversion Volume (AF)
MINIMUM STREAM FLOW	0.040	6.40

** The authorized water usage reflects a diversion volume limited to the total estimated consumptive use volume associated with the irrigation of 3.2 acres at a consumptive use rate of 2.00 afa/acre. The authorized diversion rate is the maximum continuous diversion rate possible under this rental and it reflects the maximum annual rental diversion volume, applied continuously throughout the rental season of use (92 days) from July 1 through September 30.*

Detailed water right conditions are attached.

WATER USE DETAILS

LOCATION OF POINT(S) OF DIVERSION

MEADOW CREEK SWSE Sec. 4, Twp 10N, Rge 13E, CUSTER County

Beneficial Use	Diversion Rate	Volume
MINIMUM STREAM FLOW	0.04 CFS	6.40 AF

SEASON OF USE

Water Right No.	From	To	Diversion Rate
71-10975	7/1	9/30	0.030 CFS
71-10976	7/1	9/30	0.010 CFS
71-10977	7/1	9/30	0.040 CFS
71-10978	7/1	9/30	0.040 CFS

RENTERS PLACE OF USE: MINIMUM STREAM FLOW

The place of use for this rental is the reach above the points of diversion listed above.

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
4. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
5. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
6. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
7. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
8. The maximum continuous diversion rate for this rental is limited to 0.04 cfs between the period of July 1 through September 30, which provides a maximum daily diversion of 0.07 af and maximum annual diversion volume of 6.4 af for the 92 day authorized season of use for this rental.
9. Use of water under this rights is regulated by a watermaster with the responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within the State Water District No. 170 (Upper Salmon Basin) and Water Subdistrict 71 (Stanley Area).
10. The duration of this rental shall be indefinite, however the rental may be reviewed every 100 years, with the first review commencing after December 31, 2116.

11. The term of this rental is subject to an August 15, 2017 purchase and sale agreement from Western Rivers Conservancy to the Idaho Water Resource Board. If the purchase and sale transaction is not completed prior to March 31, 2018, Western Rivers may request that this rental agreement be terminated so that their water rights may be released from the Water Supply Bank.
12. The extent of the beneficial use of water authorized under this rental is limited to the amount necessary to maintain minimum stream flows on Meadow Creek. Upon finding and order of the Director, the renter may be required to install and maintain gaging stations on Meadow Creek to ensure measurement and maintenance of the relevant minimum stream flows.

**STATE OF IDAHO
WATER RESOURCE BOARD**

**APPLICATION TO RENT WATER
FROM THE BOARD'S WATER SUPPLY BANK**

Applicant Name: Idaho Water Resource Board (IWRB)

Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

MINIMUM REQUIREMENT CHECKLIST

Check All Items as Either Attached (Yes) or Not Applicable (N/A)

Application to Rent Water (Continued)

1. CONTACT INFORMATION

A. Applicant Idaho Water Resource Board

Mailing Address 322 E Front Street, PO Box 83720 Boise Idaho 83720
Street City State Zip Code
 Email Address _____ Phone Number 208-287-4800

B. Is this application being completed by an authorized representative on behalf of the applicant? Yes ☐ No ☒
 If yes, representatives (includes company employees if the applicant is a corporation, as well as legal counsel or consultants) should provide their information below if they desire to be included on correspondence with the rental applicant.

Representative _____ Professional Title _____
 Organization _____ Relationship to Applicant _____
 Mailing Address _____
 Email Address _____ Phone Number _____

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it Attachment 2.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them Attachment 3A:

The rental of this water is intended to supply flow to the existing minimum stream flow water right on Meadow Creek No. 71-10894. The rental to the MSF is intended to increase natural flow to improve habitat for ESA-listed Chinook salmon and steelhead. See further documentation labeled Attachment 3A.

B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
0.14 CFS	AF	CFS	9.6 AF	3.2 AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)	**Applicant's preference if rental application cannot be processed prior to the latest possible start?
7/1/2018		☐ 1 ☒ 2 ☐ 3 ☐ 4 ☐ 5	☒ Process application as soon as possible ☐ Return application to applicant

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

*Pursuant to IDAPA 37.02.03.30.06 the IWRB wishes to rent the water in perpetuity. See IWRB funding resolutions dated May 19th, 2017.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

No irrigation of POU. Purpose of use is instream flow with delivery to the Minimum Stream Flow water right on Meadow Creek.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
check structure	Meadow Creek	See Attachment A for full list

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒
If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☐ Irrigation _____ (number of acres) Duration: Subject to IDWR standard seasons of use
- ☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)
- ☒ Other: in-stream flow from: 7/1 (mm/dd) to: 9/30 (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☒ Yes ☐ No ☐
If yes, justify the rate of flow and attach any supporting documents as Attachment 3J. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☐ No ☒
If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it Attachment 3K.
POU is instream

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:
See Attachment A

**STATE OF IDAHO
WATER RESOURCE BOARD**

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
71-10975	irrigation	0.03	9.6	3.2		0.03	9.6	3.2
71-10976	irrigation	0.06	9.6	3.2		0.06	9.6	3.2
71-10977	irrigation	0.01	9.6	3.2		0.01	9.6	3.2
71-10978	irrigation	0.04	9.6	3.2		0.04	9.6	3.2
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.14	38.4	12.8
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☒ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

The rental proposes to rent the full standard head gate requirement of 3.0 AF/Acre at the PODs and deliver the standard consumptive use volume of 2.0 AF/Acre to the Meadow Creek MSF.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☒ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☐ No ☒
If yes, describe:

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒
If yes, describe the date and location of the NOV.

- D. Additional Information

DECLARATION

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

Water Modeling Requirement Information Sheet

Information on water modeling requirements for rental requests within special administrative areas

Important information on requesting rental water within special administrative areas: Refer to the information below to determine whether the modeling of potential impacts from your rental request is necessary. Use Section 4 of the rental application to identify selected water rights. If you submit an application to rent water from within a special administrative area and water modeling is required, your rental request will be returned if water modeling is not provided.

Water modeling may be required when an application to rent water involves one of two scenarios:

Scenario 1: The rental request proposes to divert water from a regulated water source and/or within a special administrative area AND the distance between the rental point(s) of diversion (POD) and the POD(s) for the leased water right(s) is greater than the administratively established, acceptable distance.

Regulated water sources may areas include:

- A. Ground water resources within the modeled area of the Eastern Snake Plain Aquifer (ESPA) and tributary aquifers;
- B. Ground water within Ground Water Management Areas (GWMAs) or Critical Ground Water Areas (CGWAs);
- C. Water resources within other specified administrative areas, as established by the Idaho Water Resource Board (IWRB) or the Idaho Department of Water Resources.

The distance between any rental POD(s) and the POD(s) for a leased water right to be rented is important. On the ESPA, distance is measured in terms of model cells that cover an area of one square mile. Ground water modeling is not required if lease POD(s) and rental POD(s) are located within the same model cell or within adjacent model cells. If the lease and rental PODs are separated by more than one model cell groundwater modeling must be completed using the IDWR ESPA Transfer Tool and modeling results must be submitted with the rental application. ESPA modeling tools can be accessed and freely downloaded from IDWR's website by visiting: www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.

Ground water modeling may be required within GWMAs, CGWAs or other regulated administrative areas. Applicants who desire to rent water within an established GWMA, CGWA or other regulated administrative area should consult IDWR's website before submitting their application to review the current status of administrative orders related to regulated administrative areas. Consult www.idwr.idaho.gov/WaterInformation/GroundWaterManagement/designated_areas.htm for information on GWMAs or CGWAs, visit <https://idwr.maps.arcgis.com/home/> to use mapping tools to find other regulated areas.

Applicants interested in renting water within a GWMA, CGWA or other regulated administrative areas should request water rights that have been leased into the Bank from within the same administrative area. Generally, the Bank will not permit a rental of water within a regulated administrative area if the leased water rights are not located within that same administrative area.

Scenario 2: A rental request proposes to divert water from a different but hydraulically connected water source.

Modeling situations may include:

- A. Rental requests that propose to divert surface water rights via ground water POD(s) (wells); and
- B. Rental requests that propose to divert ground water from one aquifer when the right being rented authorizes the diversion of ground water from a hydraulically connected, tributary aquifer.

Rental requests that propose to divert surface water rights from ground water points of diversion may be considered if ground water modeling establishes that the surface and ground water resources are directly and immediately hydraulically connected. An acceptable hydraulic connection occurs when at least 50 percent of the total depletions from a well are detectable from the original water source within a 24 hour period. The existing (leased) POD and proposed (rental) POD must be proximate such that diversion and use of water from the proposed POD would have substantially the same effect on the hydraulically-connected source as diversion and use of water from the original POD.

Requests to rent ground water across tributary aquifer sources may be considered if ground water modeling is provided to demonstrate that two aquifers are hydraulically connected and the anticipated impacts of diverting ground water from one source through the other is modeled accordingly.

For more information about rental application requirements, contact IDWR at (208) 287-4800.

Memorandum

To: Water Supply Bank
From: Amy Cassel
Date: July 7, 2017
Re: Meadow Creek flow measurement

On June 5, 2017, I took a flow measurement on Meadow Creek at LATITUDE 44.187301 LONGITUDE -114.964388. Discharge at this location was 20.96 cfs. This location was upstream of two active diversions that can divert a total of 8.39 cfs. While those two diversions were actively diverting on June 5, 2017, the exact amount of water diverted is unknown.

The Minimum Stream Flow on Meadow Creek (71-10894) for June is 24.5 cfs. Only in the absence of any active diversions downstream and with significant return flows that are not documented to date, the Minimum Stream Flow would not be met. Given that 2017 has been an exceptionally high water year with snowpack in the Sawtooth Valley at nearly 200% of normal by May 1, 2017 (the onset of the irrigation season), the natural hydrograph in Meadow Creek on June 5, 2017 did not supply sufficient water to meet the MSF.

MEMO
Sawtooth National Recreation Area
 Sawtooth National Forest

To: Amy Cassel Dept/Agency: IDWR, Salmon
 From: Mark Moulton Date: July 10, 2017
 Subject: Perspective regarding the traditional flow impairment of Goat and Meadow Creeks

You have requested my knowledge and perspective regarding the traditional impairment of summer flows at the mouths of Goat and Meadow Creeks near Stanley Idaho. I have found no measurements of flow in these particular reaches in our records, however I have had many opportunities to observe them qualitatively at their crossings under Highway 21 since I began my position with the Sawtooth National Recreation Area in 1991. On a few occasions I have also had the opportunity to observe and photograph these reaches on site. Using professional knowledge and resources at hand, I have provided below my brief perspective of their impairment relative to the established minimum stream flows (MSF) administered by IDWR.

I have assumed no impairment during the non-irrigation season (November through April), though some diversions have remained open during these periods in the past. Also, the onset, magnitude, and duration of snowmelt during May, June, and July makes this period the most variable of the annual hydrograph year-to-year. As such, 'impairment' may be more likely during a particular period of these months, but still varies from snowmelt season to season.

Note that in my perspective, the basis for the MSFs may have suffered from the lack of specific hydrologic information when established. Goat Creek is the 'larger' and flashier of the two waterways, and heads primarily in the high granite headwalls of the Sawtooth Mountains. In contrast, the primary source of Meadow Creek is the extensive springs that surface at the base of the moraines southwest of Stanley, Idaho. The MSFs do not reflect these fundamental characteristics. But they are what they are. As such, my brief professional conclusions that follow reflect all these assumptions and limitations.

Q3.I

Water rights 71-10964, 71-10965, 71-10967, and 71-10968 are currently rented by the Idaho Water Resource Board to meet the MSF on Meadow Creek. The rental volume of those rights contribute to the MSF but given the low natural hydrograph of Meadow Creek and number of active diversions downstream of the rented water rights, additional flow is still needed to meet the MSF during the irrigation season.

WHEREAS, Chinook salmon, steelhead, and bull trout habitat in the Upper Salmon River basin is limited by seasonally disconnected tributaries; and

WHEREAS, the 2004 Snake River Water Rights ("Nez Perce") Agreement commits the state to providing incentives for improving fish habitat which includes improving or protecting flow conditions to augment stream flows; and

WHEREAS, the Nez Perce Agreement directed the Board to establish minimum streamflow water rights on Goat Creek and Meadow Creek to be met through water right rentals or acquisitions under state law; and

WHEREAS, Goat Creek and Meadow Creek have been identified as high priority streams for flow restoration efforts, to provide high quality habitat for anadromous Chinook salmon and steelhead and resident bull trout, and

WHEREAS, it is in the interest of the State of Idaho to reconnect Goat Creek and Meadow Creek to Valley Creek to encourage recovery of ESA-listed Chinook salmon, steelhead, and bull trout fish; and

WHEREAS, upon acquisition the Board anticipates leasing Water Right Nos. 71-10964, 71-10965, 71-10966, 71-10967, 71-10968, 71-10969, 71-10970, 71-10971 and a portion of 71-14, 71-15, 71-17, and 71-18 into the Water Supply Bank and renting the rights out for delivery to minimum stream flow Water Right No. 71-10894 on Meadow Creek and 71-10895 on Goat Creek; and

WHEREAS, a permanent rental will require administration in perpetuity by the Water District 71 Watermaster; and

WHEREAS, an amount of fourteen thousand six hundred twenty dollars (\$14,620) has been proposed to compensate Water District 71 to permanently administer delivery of the rented rights to minimum stream flow Water Right Nos. 71-10894 and 71-10895; and

WHEREAS, funds are available from the Bonneville Power Administration through the Columbia Basin Water Transactions Program; and

WHEREAS, the Goat Creek and Meadow Creek Permanent Rental transaction is in the public interest and consistent with the State Water Plan; and

NOW THEREFORE, BE IT RESOLVED that the Board authorizes the Chairman to lease the purchased Water Right Nos. 71-10964, 71-10965, 71-10966, 71-10967, 71-10968, 71-10969, 71-10970, 71-10971 and a portion of 71-14, 71-15, 71-17, and 71-18 into the Water Supply Bank and to permanently rent the rights for delivery to Water Right No. 71-10894 on Meadow Creek and 71-10895

on Goat Creek; and

NOW THEREFORE, BE IT FURTHER RESOLVED that the Board authorizes the Chairman to enter into a contract with Water District 71 to permanently administer said rental in the amount of fourteen thousand, six hundred twenty dollars (\$14,620); and

NOW THEREFORE, BE IT FURTHER RESOLVED that this resolution is subject to the condition that the Board receives the requested funding from the Bonneville Power Administration through the Columbia Basin Water Transactions Program in the amount of fourteen thousand, six hundred twenty dollars (\$14,620).

**RE: RENTAL OF WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NOS. 71-10975, 71-10976, 71-10977, and 71-10978**

Dear Renter:

Please find a copy of a fully executed Water Supply Bank Rental Agreement in connection with the rental of 6.40 acre-feet of water for minimum stream flow during 2017. Upon receipt of this fully executed agreement, you are authorized to divert water in compliance with the conditions of water use described in the agreement.

Subject to a resolution of the Idaho Water Resource Board dated May 19, 2017, there shall be a single rental payment of one thousand, four hundred, thirty five dollars and fifteen cents (\$1,435.15) to cover administrative fees associated with administration of rental agreements 186 and 197. No rental payments will be disbursed to the water right lessor.

If you have any questions, please contact this office at (208) 287-4800.

Sincerely,

Water Supply Bank

Enclosure: Rental Agreement (copy)

Memorandum

To: Water Rights 71-10975, 71-10976, 71-10977 and 17-10978

From: Remington Buyer

Date: December 4, 2017

Re: Water Supply Bank Rental Application 881 for Agreement 197

Purpose/Narrative: On September 7, 2017, IDWR received applications to rent the above listed water rights from the Water Supply Bank for an indefinite period of time, to facilitate a permanent dedication of these water rights to the Idaho Water Resource Board's (IWRB; Board) minimum stream flow (MSF) water right 71-10894 on Meadow Creek, tributary to Goat Creek. This rental request supplements a rental request submitted earlier in 2017 (Rental Agreement No. 186), which also authorized a permanent rental of water rights to IWRB MSF water rights. This memo summarizes a review of the second rental application.

Authority to File: The application has been submitted on behalf of the IWRB by Brian Patton, Executive Officer of the IWRB. No concerns about authority to file.

Water Right Validity/Forfeiture Evaluation: The Board's MSF water rights are valid as are the water rights being rented. No concerns about water right validity or forfeiture.

Injury Evaluation/Rentability: No injury is evident through the rental of these water rights from the Bank.

Enlargement of Use/Rentability: The water rights being rented authorize irrigation usage at a diversion volume of 3 afa/acre. This rental proposes to change the nature of use for these water rights from irrigation to minimum stream flow. To avoid enlargement, only the consumptive use volume associated with the water rights (2 afa/acre) will be rented.

Local Public Interest: The purpose of this rental is to supplement IWRB MSF water rights that were created in 2005, following an agreement between the State of Idaho and the Nez Perce Tribe ("Nez Perce Agreement"). Documentation provided by Amy Cassel and Mark Moulton as part of the rental application alleges that MSF water right 71-10894 is not met all times throughout the year. Pursuant to the objectives and terms of the Nez Perce Agreement, this rental demonstrates State of Idaho commitments to improve fish habitat through improved stream flows in the Salmon River, which is in the local public interest.

Additionally, because this is intended to be a permanent rental, legal notice of this proposed transaction was advertised in all relevant major newspapers in Idaho, including the Idaho Statesman, Magic Valley Times News, Lewiston Tribune, Challis Messenger, and the Idaho Falls Post Register. Two successive circulations were run in all papers and members of the public were provided until December 4, 2017 to provide comments on the transaction. No comments were received and staff have no reason to consider that this rental is contrary to any local public interests.

Beneficial Use/Conservation of Water Resources: Minimum stream flows are recognized beneficial uses in Idaho. However, only minimum stream flows, not ideal stream flows, are to be considered a beneficial use. In light of documentary evidence presented alleging that minimum stream flows are not presently being met, to the extent that water rented under this rental agreement improves or satisfies the IWRB MSF water rights, the use of water under this rental agreement shall constitute a beneficial use and is not contrary to rules and regulations governing conservation of Idaho water resources.

Department/Watermaster Comments: The water rights are subject to administration by Water District 170 – Upper Salmon River Basin, as well as Water District 71 – Stanley Area. Comments were solicited from WD 170 Watermaster Cindy Yenter, Water Subdistrict 71 Watermaster Morgan Miller, along with IDWR Southern Region staff.

Water Supply Bank Evaluation: The Idaho Water Resource Board has by resolution approved for these water rights to be rented into the Bank indefinitely. The rental is acceptable. Subject to no adverse information being provided through any final public, watermaster or regional office comments, it is proposed that these water rights should be permanently rented from the Bank, with a review period authorized every 100 years, to accommodate periodic review of this perpetual rental.

NOTICE OF PROPOSED RENTAL FROM WATER SUPPLY BANK

Notice is hereby given pursuant to [IDAPA Rule 37.02.03.030.02 \(Water Supply Bank Rule 30.02\)](#) that the Idaho Water Resource Board (IWRB), PO BOX 83720, Boise, ID, 83702-0098, filed an application on September 7, 2017 (Water Supply Bank Rental Application No. 881), to rent Water Right No(s). 71-10975, 71-10976, 71-10977 and 71-10978 from the Water Supply Bank for an indefinite period of time. The proposed rental in Custer County would provide for the permanent dedication of 0.14 cfs from Meadow Creek for maintenance of the IWRB's minimum stream flow water right on Meadow Creek (water right 71-10894) which is tributary to the Salmon River.

Comments may be submitted based on the criteria of Section 42-1763, Idaho Code. Comments should be filed in writing to the Idaho Department of Water Resources, PO Box 83720, Boise, ID 83720-0098, or emailed to Bank@idwr.idaho.gov on or before 12/4/17. For more information, visit www.idwr.idaho.gov/water-supply-bank.
