Re: Transfer 81977 for Sunrain Varieties LLC

Water rights 22-256A (priority 6/1/1890) and 22-2053B (priority 5/31/1910) have been limited to irrigating 49 acres. Water rights 22-14138 (priority 6/1/1889) and 22-14139 (priority 6/1/1890) have been limited to irrigating 210 acres. Transfer 81977 proposes to combine the four water rights into one 259 acre place of use.

When priorities junior to the 6/1/1889 water right have been curtailed on Mahogany Creek, the Sunrain Varieties LLC water rights have been limited to a 210 place of use under water right 22-14138. Therefore, the transfer should be approved with the following condition to prevent an expansion of consumptive use after the three junior rights have been curtailed:

Water rights 22-256A, 22-2053B, 22-14138, and 22-14139 have a combined place of use of 259 acres but are limited to irrigating only 210 acres after priorities junior to 6/1/1889 on Mahogany Creek have been curtailed.
