APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it Attachment #8a.

1. Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above.:

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand what consumers are looking for and what gaps exist in the current market.

2. Once a market need is identified, the next step is to develop a concept. This involves brainstorming ideas and creating a prototype that demonstrates the basic functionality of the product.

3. The third step is to conduct a feasibility study. This involves evaluating the technical, financial, and market viability of the product concept. It also includes identifying potential risks and challenges.

4. After the feasibility study is complete, the next step is to develop a business plan. This document outlines the company's goals, strategies, and financial projections. It is used to attract investors and secure funding.

5. The final step in the process is to launch the product. This involves manufacturing the product, distributing it to retailers, and promoting it through marketing campaigns.

FEE MEMORANDUM

Date: November 28, 2017
To: GW Finance Co., LLC Transfer #82025 File
From: Jim Bitzenburg
Re: Receipting/disposition of fees paid

This transfer was filed on November 28, 2017 to change a point of diversion (POD) on three stockwater/commercial rights at a CAFO in the Raft River Valley. The fee is based on the combined flow rate for the three rights, 0.63 cfs, since this amount could be diverted from any one or all of the PODs. From the transfer fee schedule, 0.63 cfs equates to a fee of \$500.00, which was paid with the application with check #13049 from Heglar Creek Dairy, LLC; receipt #S036469.

TRANSFER SYNOPSIS

Date: November 27, 2017
To: Transfer #82025, GW Finance Co., LLC Dairy POD Transfer file
From: Jim Bitzenburg
Re: Summary of transfer

Application for transfer proposes to change the currently authorized location of one of three points of diversion (POD) for three stockwater and commercial rights associated with a CAFO located approximately 13.4 to 14.3 miles east and 2.5 to 3.3 miles south of the intersection of Interstate Highways 84 and 86 east of Burley. The POD to be changed is located approximately 13.6 miles east and 3.1 miles south of the I-84/I-86 intersection, while the proposed POD location is a new well approximately 0.2 miles northeast in the adjacent quarter-quarter section. The three ground water rights allow the diversion of up to 0.63 cfs.

The CAFO facility is located within the Raft River Critical Ground Water Area, so the transfer will be advertised. Since the facility is within Water District 143, comments will be solicited from the WD-143 Watermaster.

The rights at the CAFO are 43-13070 (0.12 cfs, stockwater and commercial), 43-13072 (0.15 cfs, stockwater and commercial), and 43-13792 (0.36 cfs, stockwater and commercial).

This transfer is essentially a 'paper transfer' since the POD location (well) being changed has not yet been drilled.
