Gene,

I was able to go back to run through the numbers and it is our opinion that I may be in the Owners best interest to request the max allowed water right for the property to ensure that their right to draw that water in the future is reserved. So, below is the calcs to back up the calm for additional irrigation.

- Total Site Area: 4.73 acres
- Landscape Irrigation
 - Irrigated Landscape: 0.81 acres
 - Temp/Seasonal Irrigated Landscape (includes property along ditch and temp irrigation at the back of lot): 0.98 acres
 - Total Irrigable Land: 1.79 acres
 - $4.73\text{acres} / .14\text{cfs} = 1.79\text{acres} / .05\text{cfs}$
 - $.05\text{cfs} \times 448.83 = 22 \text{ GPM}$
 - $22 \text{ GPM} / 24 \text{ HR} = 66 \text{ GPM} / 8 \text{ HR}$

So, if we could apply for the maximum CFS that IDWR will allow it be with the following numbers; .05 CFS over 1.79 irrigable acres. It will provide the Owner with enough GPM to support the system within their desired watering window of 8 hours. I'll call you shortly.

Thanks,

landscape designer

Sean,

Can I call you this morning to discuss the requirements DWR is requiring on the well application. See the attached letter. When I did calculations for the CUP I used max. 60% impervious for the 4.73 acre site. That leaves about 1.89 acres in grass etc. but where not sprinkler the back part next to the ditch. Are we going to be ok to say 1 acre on the application for well water use?

RE: Amendment Required for Application for Permit 63-34473

Dear Applicant,

On November 9, 2017, you filed an application for permit to appropriate water for an irrigation use in Section 8, Township 4 North, Range 2 West. After review of the document an amendment is required to complete the application process.

- The application received on November 9th was a copy of the signed application. Please provide the original signed document.
- The 0.02 cfs diversion requested is an insufficient rate of flow for a surface area of 4.8 acres. A 4.8 acre parcel may receive up to 0.14 cfs or 63 gallons per minute. The 4.8 acre description may represent the entire property, and not the actual irrigation use. If the church proposes to only irrigate 1.0 acre within the 4.8 acre parcel, a rate of 0.03 cfs may be applied for, but 0.02 cfs is sufficient. The applicant should either amend the rate of flow, or amend the acres described for irrigation use.
- All Basin 63 ground water applications for permit are required to state a water bearing zone. This is a proposed depth range from which the well will diverting water. Please provide information that fulfills this requirement.

Please make the appropriate amendments return the form to my office for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Respectfully,

Patrick Kelly

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on October 19, 2017. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- **The Signature and/or Title were not provided correctly.** Please provide the title of the Applicant and provide evidence of authority to sign. **See section 1-** If the application is in the name of a corporation, the names and addresses of its directors and officers shall be provided. If the application is filed by or on behalf of a partnership or joint venture, the application shall provide the names and addresses of all partners and shall designate the managing partner, if any. (7-1-93). **Please provide some evidence for Jeff Wheeler to establish he has authority to apply for the Church.**

The original incomplete application is enclosed. Please make the necessary amendments to the original form, **initial and date next to the changes**, and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will be issued for this filing. This letter is an attempt to ensure that your application is complete in order to establish a priority date. You may receive future correspondence regarding more specific details of your application. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at (208)334-2190 and ask for the "office day person" if you have any questions about the necessary information.

Sincerely,

Western Region Water Rights Staff
