Michael,

Attached is a single PDF file which includes the first page of the application with the revised information and a revised Table 1 showing the places of use.

Thanks,

Bob Ablondi

Hello Bob.

I see from your email below that you sent me the amended docs on 10/26. The bad news is that I never received that email. I was wondering about the delay. Please send them again and we will do our best to get them advertised ASAP.

Michael

Michael,

I thought I would check to see if the Teton Springs Transfer Application has gone out for public notice and if there have been any responses.

Thanks,

Bob Ablondi

In a message dated 10/26/2017 10:03:31 AM Mountain Standard Time, RTAblondi@aol.com writes:

Michael,

Thanks for your phone call yesterday. Attached is page 1 of the transfer application that corrects several items you mentioned:

- check only box for "Add diversion point"
- show points of diversion to nearest 40 acre (1/4-1/4 section) and not 10 acre (1/4-1/4-1/4 section).
- change source to "groundwater" and not geologic formation.

Also attached as a PDF is revised Table 1 which eliminates as a place of use for permit 22-13270,(NW-1/4, NE-1/4 Sec 24) which included the two domestic use rights for the Jacobsen property, currently in the name of Prometierra, LLC.

Let me know if you need anything for the processing of this application.
