9. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Section 42-222, Idaho Code, or other Department approval.
10. The right holder shall accomplish the change authorized by this transfer within five years of the date of this approval.
11. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
12. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

CONDITIONS OF APPROVAL

10. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company deliveries. 11. The right holder shall accomplish the change authorized by this transfer within five years of the date of this approval.
12. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

Re: Amended Evaluation of Sufficiency of Information Submitted

Application for transfer proposes creating a 2,086.4 acre permissible place of use (PPU) for 40 water rights (combined limit 48.94 cfs). In this transfer there are seventeen ground water rights: 43-2296B, 43-2367, 43-2409A, 43-2414, 43-2444, 43-2456, 43-4005, 43-10605, 43-12966, 43-13207, 43-13208, 43-13379, 43-13381, 43-13544, 43-13606, 43-13780, 43-13781 and twenty three Raft River rights: 43-165C, 43-168C, 43-169E, 43-172C, 43-178D, 43-10608, 43-10789, 43-11283, 43-11284, 43-11285, 43-11286, 43-11287, 43-11291, 43-11292, 43-13008, 43-13009, 43-13010, 43-13011, 43-13012, 43-13013, 43-13014, 43-13015 and 43-13017. Place of use (POU) and points of diversion (POD) are located approximately 4.3 to 7.7 miles south and 0.2 to 1.8 miles east of Malta.

Thirteen existing wells within the Proposed PPU will be added to all 17 ground water rights, and a Raft River POD will be added to each of the 23 Raft River Rights, for a total of two PODs on each Raft River water right.

All water rights used in the proposed PPU are included in this transfer and will have a combined limit of 48.94 cfs and will be limited to the irrigation of 1952.3 acres. Ground water rights when combined will be limited to 34.19 cfs, 7678.4 af and the irrigation of 1952.3 acres. Surface water rights when combined will be limited to 21.63 cfs and the irrigation of 714.0 acres. Ground water PODs are located in Water District 143 and Raft River PODs are administered by Water District 43B. Watermaster comments will be solicited from both water districts.

Water right 43-13011 was partially decreed on 6/28/2002 and two combined limit conditions that were placed on other associated water rights were not included on the partial decree. The first condition limits the combined use of water rights 43-13011, 43-13012, 43-13014 and 43-13015 to the irrigation of 100 acres. The second limits water rights 43-13008, 43-13009, 43-13010, 43-13011, 43-13013 and 43-13015 to the irrigation of 120 acres. Both of these conditions have been added to water right 43-13011 in the transfer and the acre limit has been reduced from 220 to 100 acres. Additionally, water right 43-13015 was partially decreed on the same date without the 100 acre combined limit listed above. It has been added to water right 43-13015 and the acre limit has been reduced from 120 acres to the 100 acre limit.

- **Authority to File:** IDWR records indicate the applicant currently owns the water rights and all lands involved in this transfer.
- **Water Right Validity:** Water right 43-13207 was decreed in the SRBA on 10/23/2002. Water rights 43-13379 and 43-13381 were decreed in the SRBA on 12/31/2003. The other 37 water rights in the transfer were all decreed in the SRBA on 6/28/2002. Recent aerial and satellite imagery indicate the property involved with this transfer appears irrigated.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated.
- **Effect on Agricultural Base of the Local Economy:**
None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing

Kallan,

I thought maybe the attached maps would help, they are maps of the currently irrigated acres totaling 1972.5 acres. Since 52 acres were transferred out of section 7 in previous transfers, we need to identify 20.2 additional acres to dry up for the authorized irrigation. I hope that helps, if you can tell me which quarter-quarters to reduce by 20.2 acres you could just respond by email, otherwise I'll see you tomorrow,

Kallan,

Transfer #81371 is done with advertising with no protests. So now it's almost ready to be forwarded for approval. I just need you to provide the information for the "206" map indicating where the 1952.3 acres currently authorized for irrigation are located. I have enclosed a map that outlines the 2086.4 acre permissible place of use and a page from the transfer containing a grid of the acres per quarter-quarter in the permissible place of use. If you could indicate where I'm to trim the 134.1 acres from by quarter -quarter and then draw a rough outline on the map or make one of your own and return that information to me, then I can create a shape that reflects the authorized irrigation and we can move forward with getting this transfer approved.

With all the flooding that's been going on, I imagine you're pretty busy, so I understand if it takes a while to get back to me, but the sooner we can get this done, the sooner the transfer can be submitted for approval. Call me if you have any questions,

Bill
