Q. 10.

A portion of the property has existing surface water rights from Meadow Creek: 71-10960, 71-10961, 71-10962, 71-10963. Those surface rights will be leased into the water supply bank and rented by the Idaho Water Resource Board for instream delivery to the Minimum Stream Flow on Meadow Creek No. 71-10894. The term of the lease/rental with the IWRB will be 20 years. Therefore, those surface rights will be instream and not available for irrigation. The point of diversion for the surface rights will be closed and irrigation for the place of use will be accomplished through the proposed groundwater permit.

Q.12.

The applicant is seeking a new groundwater well to irrigate approximately 8.7 acres. The Meadow Creek surface water rights that are appurtenant to a portion of the proposed groundwater permit place of use will be unavailable for irrigation starting in April 2018 when they will be placed in the water supply bank and rented for instream delivery to the Minimum Stream Flow on Meadow Creek. The existing domestic well right No. 71-10157 will remain in use for domestic purposes and no change to that right is proposed.

Watermaster comment for 71-10979 and 71-10980:

71-10980 cannot be approved at 0.20 cfs for irrigation. Total acreage is 8.7 ac X .02 cfs/ac = 0.17 cfs. The irrigation component may be additive to the stock water component in this case, for a total of 0.19 cfs and still be within the fee limit.

Please note that both of these applications should be processed and conditioned as primary ground water appropriations, and subtracted from W&S accounting. The appurtenant surface water rights have been leased to the water supply bank as part of a water transactions acquisition, and will not be available for use on the properties.

Each application represents a proposal to irrigate more than 5 acres. Under the WD170 measurement order, systems authorized to irrigate more than 5 acres are required to measure and report diversions. Please apply conditions 01H, 215 and 198.

RE: Application For Permit No. 71-10980

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the **CHALLIS MESSENGER** on **11/16/2017 and 11/23/2017**. Protests to this application may be submitted for a period ending ten (10) days after the second publication. Any protest against this application must be filed with the Department of Water Resources, together with a protest fee of \$25.00 for each application, on or before **December 4, 2017**.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

RE: Application for Permit No(s). 71-10979, 71-10980

Dear Cindy:

A copy of the above referenced application is enclosed. Please review the application, and provide any necessary comments within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the water master, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline

Use: IRRIGATION 05/01 to 10/31 0.2 CFS

Use: STOCKWATER 05/01 to 10/31 0.02 CFS

Total Diversion: 0.2 CFS

Date Filed: 9/13/2017

Place Of Use: IRRIGATION, DOMESTIC, STOCKWATER

T10N R13E S17 SWSW SESW

Total Acres: 10.7

Application for permit proposes to divert 0.20 cfs ground water from a proposed well for the irrigation of 10.7 acres and for domestic/stock water use. Proposed point of diversion and place of use is located approximately 2.0 miles west and 1.8 miles south of the Highway 75 & 21 intersection in Stanley. This application proposes the diversion and use of water tributary to a federally designated Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because 0.20 cfs and 10.7 acres will be applied to the subordination amounts specified in the decree for the Salmon River Wild & Scenic River.
