Re: Application for Permit No. 75-7374A

The Idaho Department of Water Resources issued a permit for 75-7373 on July 26, 1983. Proof of beneficial use was submitted on July 29, 1988. In May of 1990, this right was split into 75-7374A and 75-7374B. This amendment is for right 75-7374A. During a field exam on August 6, 2012, I found evidence of irrigation. However, much of the land covered by the original permit had been sold to other owners and they had developed other water rights. I found that only a portion of the land was not already covered by an active water right. The water right license will be limited to the water developed under this permit. The enclosed application for amendment includes the location of a point of diversion that was developed differently than what was authorized under the permit.

By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 21 days, October 2, 2017.

If you have any questions, please call me at (208)287-4881.

Sincerely,

Sandra Thiel
Senior Water Resource Agent
