RE: Water Right Permit No. 57-11672

Dear Mr. Schaefer:

In 2005, the Idaho Department of Water Resources (Department) issued water right permit 57-11672 to Michael Campbell. The permit authorized the development of ground water to divert 0.14 cfs for irrigation and stockwater. I believe you currently own the property at the permit place of use

The final step in the water appropriation process is the issuance of a water right license. By issuing a license, the Department recognizes that all the requirements for establishing a water right were met. No water right license can be issued, however, if the development authorized by the permit did not occur within the authorized time period. For that reason, before issuing a license the Department must conduct an examination to verify the development.

The following information will help me license permit 57-11672:

- Do you receive any water from the Opaline Irrigation District or from any other source?
- Can you provide me with information about the pump and the irrigation system? If possible please supply information about the make, model and horse power of your pump?
- What type of stock do you have and how many?

If you believe a water right was developed in accordance with the permit, please contact me at 208.342.3482 or by email at sandra.thiel@idwr.idaho.gov. **Please provide the above information by November 3, 2017.**

Sincerely,

Sandra Thiel
Sr. Water Rights Agent
