

MEMORANDUM

Date: June 03, 2016
To: Water Right File 95-8652
From: Michele Edl
Re: License POU

Adjudication agent Steve Clelland, brought this right to my attention.

In his review for the claim, he found that the POU shapes for the license did not match the grid addresses.

In my licensing effort, I found domestic uses existed in both government lot 1(NENE) and government lot 2(ENE) of section 6, and government lot 4(NESE) of section 36. But only government lot 1(NENE) of section 6 and government lot 4(NESE) of section 36 appears on the face of the license. Government lot 2(ENE) of section 6 is missing from the grid.

The license is too old to correct through an amendment in water rights processing and it is too young to correct through an adjudication claim in adjudication processing.

Arrow Point Community Association Inc will need to file a transfer to make the correction.
