

MEMORANDUM

Date: October 27, 2017

To: Transfer 81762

From: James Cefalo

Re: Transfer Evaluation

Transfer No. 81762 proposes to change the point of diversion and place of use for a 5.6-acre portion of water right 22-7189. Water right 22-7189 was split prior to the transfer. The 5.6-acre split portion was assigned water right number 22-14264. Applicants propose to move water right 22-14264 within the place of use for water rights 22-14288, 22-14296, 22-14297 and 22-14298. These four rights will be added to the transfer application as associated rights to include a combined acre limit condition.

Authority to file:

The proposed place of use and point of diversion are located on property owned by the applicants. Previously filed ownership change for water rights 22-50, 22-462, 22-463, 22-667 and 22-7189 included documents demonstrating applicant's ownership of the proposed place of use and ownership of a portion of the water rights.

Validity of the Water Right:

Water right 22-7189 were decreed on October 24, 2008. Aerial photography shows consistent irrigation of the acres to be changed. No apparent forfeiture issues.

Injury to Other Water Rights:

No injury to other water rights was identified. The application was advertised, no protests were received.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this transfer application.
