Bill,

I'm pretty sure the stipulation listed 0.16 additional acres will be dried up in addition to the 0.46 acres to be dried up to account for evaporation, so the reduction will be that amount, 3.0 ac – 0.46 acres for evap - 0.16 for agreement = 2.38 acres. Yes, we can absolutely provide a new landlist and shapefile or map for the 206 condition. I will try and get this to you tomorrow so we can get these wrapped up. We really appreciate your help on this one, thanks.

Subject: Formerly Protested Ridgeview Smith Properties LLC applications

Zach,

I'm working on completing the two formerly protested Ridgeview Smith Properties LLC applications (Ap for permit 37-23029 and transfer ap 81843 for water right 37-8372). I noticed that it was agreed that 0.6 irrigation acres would be dried up per the stipulated agreement, which leaves 2.4 acres of irrigation. Could you provide a new landlist and 206 map and/or shapefile for those 2.4 acres since the previous irrigation shape was 2.5 acres? Once I have the 206 map/shapefile updated these two aps will be able to move forward.

Thanks,

Bill
