IDAHO DEPARTMENT OF WATER RESOURCES
Water Right 78-2072

10/12/2017

1. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Comments:

1. kknobloc 12/14/2006 field
Two formal complaints against 78-2072 and involving 78-7324 have been handled by regional office staff over the past 8 years. Nothing improper about the use of water under 78-2072 was found in either case. The nature of the controversy involves the wastewater nature of the source of water for the unnamed stream in 78-7324. This stream, locally known as the Givens/Warren Ditch aka the natural ditch, appears to carry limited natural flow during the runoff period but not after that. Water in the stream after runoff ends appears to be wastewater generated upstream via 78-2072. Any additional complaints against 78-2072 should be carefully evaluated (seek more credible information from the complainant?) prior to spending more time on this matter. Field information through 2006 is filed in the regional office complaint file labeled Elk Creek and Little Elk Creek.
