ACTION OF THE DEPARTMENT OF WATER RESOURCES

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 11-07719 with the following:

CONDITIONS OF APPROVAL

1. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
2. Domestic use is for 2 homes.
3. Points of diversion are located within a 0.1 acre lot between Lots 4 & 5, Blk 1, Canyon Estates No.1, and Lot 2, Blk 1, Canyon Estates.
4. Place of use is located within Lot 5, the Pointe at Canyon Estates #1, and a 19.85 acre parcel generally described as T-6744F, W2NW 15-16-43.
5. The irrigation occurring under this domestic use shall not exceed 1/10 acre within each platted subdivision lot upon which a home has been constructed. This right does not provide for irrigation of common areas or for irrigation of lots upon which homes have not been constructed.
6. The domestic use authorized under this right shall not exceed 13,000 gallons per day per home.
7. To mitigate for the depletion of water resulting from the use of water under this right and to prevent injury to senior water right holders, the right holder has set aside a portion of water right 11-4022 for mitigation purposes.
If the specified mitigation right, or portion thereof, is sold, transferred, leased, used in any other way, or is not deliverable due to a shortage of water or a priority call, then the amount of water authorized for diversion under this right approval shall be reduced by the same proportion as the reduction to the mitigation right.
8. Diversion and use of water under this right is governed by a Water Management and Operation Plan ("Plan") (last amended February 10, 2015). The Plan outlines the delivery, measurement, reporting, and mitigation requirements associated with this right. Failure of the right holder to adhere to the provisions of the Plan, including the requirement for mitigation and to have an active officer assigned to implement the Plan, is cause for the director to issue a notice of violation, cancel or revoke the right, or request that the watermaster curtail diversion and use of water. Any amendments to the Plan must be approved in writing by IDWR.
9. The Water Management and Operation Plan for Sams Hollow Water Company shall contain the following components: (a) a description of a method for forecasting flows in Fish Haven Creek using measured Fish Haven Creek data or data from a comparable basin; (b) a fixed date each year, no later than April 1, when the volume of water to be diverted under this right during the upcoming year

WATER RIGHT NO. 11-07719

is declared and the forecasted streamflows will be compared to projected water use within the subdivision; (c) a description of curtailment or other water conservation measures that will be employed in times of mitigation water shortages, and how water users will be notified prior to May 1 about restricted water use in the year of predicted shortage; (d) a description of how the curtailment and conservation measures will be monitored and enforced; (e) a description of the entire flow path of mitigation water, including ditches, pipes, culverts, control structures, and how the system will operate; (f) a specific description and the location of each measuring device and how each measuring device will be installed and maintained; (g) a description of the frequency of measuring, comparing, and reporting; (h) a list of those to whom the reports will be submitted; (i) the identity of the specific officer, by title, in the association or corporate organization, that will be responsible for the oversight of system operation; (j) an alternate plan for mitigation water or curtailment should statutory claim no. 11-4022 ever be curtailed by the watermaster of the Bear River; and (k) an operations manual that describes duties relative to operation, monitoring, and reporting.

10. This right does not grant any right-of-way or easement across the land of another.

This amendment is issued pursuant to the provisions of Section 42-211, Idaho Code.

Signed this 27th day of September, 2017.

JAMES CEFALO
Water Resource Program Manager
