RE: Water Right Permit No. 85-7633

Dear Permit Holder(s):

Dear Mr. Hagen, this the updated letter you requested.

The Idaho Department of Water Resources (Department) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

A field examination of your property was performed in August of 2000 by Department staff. The examiner who verified your water use reported that certain elements of the permit has been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The application for permit you submitted and the permit approved by the Department allowed a point of diversion from Lawyer Creek and a place of use in Government Lot 10 (SWNW) quarter of Section 12 in Township 33 North, Range 3 East for the irrigation of 3.0 acres.

Based on the examiner's report, the point of diversion and place of use were actually developed in NENW quarter of Section 30 in Township 8 North, Range 4 West, and the place where the dairy was actually developed Government Lot 9 (SWNW) quarter of Section 12 in Township 33 North, Range 3 East. An amendment of permit will be needed to move forward with the licensing of this permit.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when issued. Please review the amendment form carefully. If you concur with the information presented, please sign and return the form with the \$100.00 filing fee within 14 days or by July 25, 2017. If we do not receive the amendment of permit form back from you, we will be forced to void the permit, since no water was developed at the point of diversion or place of use described in the application for permit or the approved permit.

If you are no longer interested in this water right permit, you can also fill out and sign the enclosed relinquishment of permit form.

If you have any questions, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel A. Nelson", with a long, sweeping horizontal line extending to the right.
