MEMORANDUM

TO: Application No. 79-14266
FROM: Patrick Kelly
DATE: August 10, 2017
RE: Salmon-Clearwater Processing, Basins 77-79 Western Region

The application proposes to divert water from a new well for domestic purposes. Water will be used for restrooms, cooking and cleaning. The use will be less than 2,500 gallons of water per day and falls within the domestic definition of 42-111.

The site is at the Grangeville Golf and Country Club. The golf course is located 1.5 miles west of Grangeville, south of Hwy 95.

Wild & Scenic River (WSR) Processing

General Information - WSR processing applies to portions of Bs 77 and 78 but not to Bs 79. It is rarely expected in Bs 78 since WSR right 78-11961 covers federal land upstream from the Rapid River Fish Hatchery slightly southwest of Riggins.¹

Typically WSR issues would be in Bs 77 upstream from Long Tom Bar on the Salmon River, WSR right 77-11941.² This also incorporates the entire Middle Fork Salmon River drainage, MSR right 77-13844.³

WSR processing is required for any source/diversion upstream from any WSR right. This applies to all sources and uses unless the applicant shows the source is not hydraulically connected to any WSR rights.

Specific Information for this Application - WSR processing is not required because the proposed source/diversion are downstream from any WSR rights.

Minimum Streamflow Rights (MSF)

General Information - MSF analysis applies to all surface water upstream⁴ from any MSF rights. Basins 77-79 have various MSF rights that might affect applications. By agreement with SO regarding these basins, specific MSF conditions of approval are not necessary provided the reviewer checks MSF issues and documents the file with the results (7/8/09 telephone conference).

Downstream MSF right 3-8 on the Snake River⁵ is not subordinate to "future dcmi" uses or "future non-dcmi (with cfs limits)" uses. Downstream Salmon River MSF right 79-14119⁶ is subordinated to future dcmi uses but not to future non-dcmi uses.

All Basin 77-79 MSF rights upstream from the ending point of 79-14119 (mouth of Salmon River) include subordination to future dcmi uses. Most of those upstream MSF rights are also subordinate to

¹ POD = T23N-R1W-S12.

² POD = T25N-R5E-S31.

³ POD = T23N-R16E-S33.

⁴ Shallow ground water tributary to surface water might involve MSF issues under conjunctive management thinking. Discuss with your supervisor if this comes up.

⁵ POD = T31N-R5W-S10.

⁶ From mouth of river T29N-R4W-S14 upstream thru about Shepp Ranch T24N-R6E-S12.

various amounts of future non-dcmi uses. None of the future non-dcmi cfs rates have been exceeded yet by new approvals. Further MSF analysis is generally not needed until a specific future non-dcmi cfs rate is exceeded.

Because the review memo extensively covers WSR and MSF issues, SO Planning Bureau comments are not needed yet (prior agreement with SO). Planning will be contacted for comments during the legal notice process as a precaution.

Specific Information for this Application –MSF analysis is not required for the proposed ground water source.

Discussion

Local Public Interest: This application is filed as a requirement to a DEQ permit specific to the area. Comment letters will be sent to IDFG as required by processing memo 62 and DEQ at advertising.
