Subject: Memos on Heating and Cooling Field Work

Hello Howie,

I am going to send you two memo's for the heating and cooling at Hemmingway and Carey schools. They are too big to send them in one email, and sometimes they don't go through due to size, so I am sending this email to let you know they are on their way. If I don't hear back from you, I will assume you received them.

I have the irrigation right just about ready to go. I just need the following things to finish it up.

- 1.) Nozzle sizes used in the Rainbird Falcon 8005 sprinklers used on the football field.
- 2.) The pressure that you run on the system.
- 3.) Confirmation of the flow rate per the earlier email I sent you with the memo.

Once I have the above 3 things, I should have them ready to sign. The Hemmingway heating and cooling permit has been licensed, so you should be getting it soon. From what I heard, the Carey heating and cooling permit is just about ready to sign also.
