Subject: RE: Carey School Irrigation Permit Mitigation

Lori,

I received your map, and it appears as though the 8.7 acres of water right 37-22205 that will be used for mitigation for non-use is as follows:

6 acres in the SWSW of Section 3 in Township 2 South, Range 21 East AND
2.7 acres in the NWNW of Section 10 in Township 2 South, Range 21 East

I will move forward with the licensing of this permit assigning these acres to permit 37-21742. Per your earlier email, I will **NOT** change the remaining 11.3 acres of mitigation use listed on water right 37-22205 water use back to supplemental irrigation. This means that a water right transfer would be needed if your client wishes to change the 11.3 acres back to supplemental irrigation in the future.

If this information is not correct or if you have any further questions, please don't hesitate to contact me.

Respectfully,

Daniel Nelson

Attached is a map designating the 8.7 acres used for permit 37-21742 and the remaining 11.3 acres to bank and use for a new application for permit. I will begin preparing the amended water bank lease application and new application for permit. Thanks for your help Dan.

Hello Lori,

This is great Lori, but I still need a map clearly designating which acres from the mitigation right will be used to mitigate this permit. I cannot move forward with licensing until I receive the map. I have spoken to the Water

Supply Bank folks, and they have seen your email concerning the water supply bank. I will send a second email with the shape file. Sometimes our email system will not let us send shape files by email. If that is the case, I can copy it to a disk and mail it to you. Please let me know if didn't receive the shape file for the irrigation use by the end of today.

Thank you.

Subject: RE: Carey School Irrigation Permit Mitigation

Good Morning Dan,

The School District plans to apply the remaining mitigation water under water right 37-22205 towards a new application for permit proposing irrigation of 11.3 acres they didn't get developed under permit 37-21742. The District would like to keep the remaining mitigation water in the bank until they have permit approval and development is underway.

Prior to your exam, I did a GIS analysis and found ~8.2 acres irrigation at the school site, resulting in a water bank lease application submitted last December on the remaining 11.8 acres not used under water right 37-22205. Your exam calculated 8.7 acres irrigation, resulting in 11.3 acres remaining under water right 37-22205. Please hold processing of the lease application. I plan to submit an amended lease application listing 1 year instead of 5, and 11.3 acres instead of 11.8 acres.

Also, can you please send me your pou shape files for the 8.7 acres you found irrigated? This will help me prepare the application for permit and an amended lease application. Thanks Dan.

Please let me know if you have questions.

Subject: Carey School Irrigation Permit Mitigation

Hello Howie and Lori,

Howie, this is the letter I spoke to you about earlier today. Lori, Howie asked me to send this letter to you and Terry.

Here is a little history:

I recently did a field examination on the Carey School for permit 37-21742. Permit 37-21742 was for 20 acres and water right 37-22205 mitigated the permit by non-use of the water right. When I did the field exam, I found 8.7 acres of irrigation, so only 8.7 acres is needed for mitigation out of water right 37-22205. This leaves 11.3 acres of the mitigation right that is not mitigating anything. This letter is a request to find out how they would

like the 11.3 acre mitigation portion of 37-22205 to be described in the water right record. Do they want to keep the entire water right as mitigation or do they want to revert the remaining portion back to supplemental irrigation. We can do that on this permit without a transfer and no additional fees, since 37-22205's use is a mitigation by non-use water use. However, after we issue the license for the permit, they would need to file a transfer to make any changes to the 11.3 acre remaining portion of 37-22205. We wanted to give them a chance to determine how they want the water right to look after this is all said and done. There is also a Water Supply Bank application on the portion of 37-22205 not being used for mitigation, but I don't know if that application will be accepted or not once the permit is issued. I am not involved in the Water Supply Bank processing, so we won't know if that will work until they review the application.

I hope this helps. If it doesn't, please don't hesitate to contact me.

Thank you.
