WATER RESOURCES
WESTERN REGION

Please print or type. Attach pages with additional information. Instructions are included at the end of this form. Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case IDWR will produce new water right number(s) for the split(s).

NOT PROCESSED. SEE Field Exam Review memo from 2/23/17					

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are on file with the county Planning and Zoning or Recorder's Office).
- OR**
- D. If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency or equivalent **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in line 1, then skip this line and go to line 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (you may copy this page, if necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

RE: Ownership Change for Water Right No. 77-7319

Dear Applicants,

The Department of Water Resources acknowledges receipt of your request for an ownership change on the water right mentioned above. However, after reviewing the request, it was determined the form was not completed and additional documentation is needed to complete this request.

A Field Exam Review memorandum written on February 23, 2017 conducted by Aaron Skinner determined *"the ownership documents provided are not acceptable by the Department as the quick [sic] claim deed is pertinent to the land, but fails to connect ownership from Strata Mining Company to F&H Mining."* A copy of the memo is included for your records. Due to this, the ownership change is unable to be processed and will be returned. You may submit this form with the required documentation at any time.

Thank you for your cooperation. If you have any questions please, contact this office at 208-334-2190.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chad Jones'.

MEMORANDUM

TO: Water Right File for 77-7319
FROM: Aaron Skinner – Water Resource Agent
DATE: February 23, 2017
SUBJECT: Field Exam Review

This water right permit was approved on October 30, 1992 for mining use for 0.04 cfs with no volume limit established. A Proof of Beneficial Use form was submitted on December 12, 1992. The field exam was completed by Department staff on September 7, 1995.

There are a few parts associated to this file that have made it difficult to know whether or not voiding the permit or drafting a license would be most beneficial. The permit holder, Strata Mining Company has since dissolved. A letter dated 12/18/2007 was in the file folder for this permit that included an Ownership Change form and associated documents from F&H Mining. F&H Mining owned a sister application, 77-14232, that was being approved under specific conditions that an Ownership Change form be received for this permit. The ownership documents provided are not acceptable by the Department as the quick claim deed is pertinent to the land, but fails to connect ownership from Strata Mining Company to F&H Mining. The sister Application for Permit (77-14232) has since lapsed due to no Proof of Beneficial Use form being submitted. Contact information for Strata Mining has been exhausted and F&H Mining was contacted, but in the process of filing a new Application for Permit. They have no interest in the right since the new mining application will be developed different than what is outlined in this permit.

Because a field exam was completed and a mining beneficial use developed, it has been decided to draft a license for this permit to Strata Mining Company. A letter will also be sent to F&H Mining giving them the opportunity to submit a Change in Ownership form with the chain of title for the mining claim. If the Change in Ownership form is not received by a designated date, the license will then become pertinent to the land allowing the Forest Service to accept or deny the license.

Applications Relative to This Permit –

Statutory Claim 77-4026 was not claimed in the Snake River Basin Adjudication and is no longer valid. The claim was attempted by Ed Davis in 1975 for the same POU as this permit, but was later determined in court not to be a valid claim.

The aforementioned sister permit 77-14232 was an attempt to expand the mining use beyond the 2,500 gpd condition associated to this permit. It later lapsed as no Beneficial Use form was submitted. Taking all this information in to consideration, the following is my review of the field exam for this permit.

Ownership: The permit is in the name Strata Mining Company. Current taxlot data for Idaho County identifies the property owner as the Payette National Forest. It is assumed a special use permit was received during the application approval process in 1992.

Source, POD, POU: The permit establishes the source as a spring in the SWSESW and

NOTES

SESWSW of Section 23. The field exam clarifies the source as an unnamed stream, a tributary of Maxwell Creek located in the SESWSW of Section 23. This clarification will be forwarded to licensing.

The POD was adjusted by removing the SWSESW of Section 23 POD as the field exam explained it was specific to domestic use that is not included on this permit. Therefore, the only POD for this permit is found in the SESWSW of Section 23. The POD consists of a 3" pipe that can be moved to fill 2 tanks near the stream and a buried hose that supplies water to the mill.

POU location was developed only in the SWSW of Section 23 as described in the field exam. A mill and various plumbing fixtures inside the mill were found within the POU. The examiner did not find any mining activity in the SESW of Section 23, so this location will be removed and not recommended for licensing.

Diversion rate and Volume: The permit has established a rate of 0.04 cfs without a volume limit. A bucket test was performed during the field exam. The test filled a 5 gallon bucket in 9 seconds. This equates to ~33 gpm or 0.07 cfs ($60 \text{ sec}/9 \text{ sec} = 6.67 \text{ fills per minute}$; $6.67 * 5 \text{ gal} = 33.4 \text{ gpm}$; $33.4/9 \text{ gpm} = 3.7 \text{ miner's inches}$; $3.7 * 0.02 \text{ cfs} = 0.07 \text{ cfs}$). The recommended rate 0.04 cfs will be forwarded to licensing.

Overlap Review: No active rights were identified in the POD/POU overlap analysis.

Summary: This permit is recommended for licensing at 0.04 cfs and per condition X03, a daily diversion volume not to exceed 2,500 gallons per day. Condition 054 was updated clarifying IDWR's expectations in enforcing bonding requirements and forwarded to licensing. Condition 09E is an inactive condition, but will be forwarded to licensing to establish discharge standards into a natural channel or subsequent system relative to water quality concerns. There are no other active conditions that meet this criteria. Condition 076 was removed and not forwarded to licensing. Condition 004 is forwarded to licensing.

SUBJECT: CHANGE OF OWNERSHIP FOR 77-7319

The file for 77-7319 is shown to be in your office for a field exam. I worked on the sister application for this filing 77-14232. One of the conditions to processing application 77-14232 was that the new owners of 77-7319 were to attain an assignment of permit to change the ownership of their existing permit into their name. The company that previously owned 77-7139 had dissolved, so there was no way to get them to assign the permit. Therefore, I told the new owners to file a change of ownership for that could be submitted with the field exam for 77-7139 to change it into their name during licensing.

The enclosed documents is the change of ownership form for 77-7139

Dear Mr. Nelson,

F&H Mining is submitting the enclosed "Notice of Change in Water Right Ownership" form. This form is being submitted to transfer the ownership of the water right number 77-7319. The current owner of the water right is listed as Strata Mining. This company cannot be located or contacted and it is believed that it no longer exists. The water right is on Forest Service land, and any use of that land must be approved by the Forest Service. F&H Mining is in the final stages of getting an Environmental Assessment approved by the Forest Service for the proposed mining project which would require the use of this water right.

F&H Mining is requesting that this water right be transferred to them for the purposes of the proposed mining project.

Thank you for your cooperation in this matter.

Please contact either Eric Klepfer at (208) 771-1472 or Lori Dombrowski at (208) 689-9416 if you have any questions regarding this issue.

Also, please copy and forward all correspondence to Eric Klepfer at Klepfer Mining Services, 13058 N. Sherwood Court, Hayden, ID 83835.

Sincerely,

Phil Hyatt
