Re: Water Right No. 63-3522 Error Corrections

Dear Water Right Owner,

Recently the Idaho Department of Water Resources (department) discovered errors with water right no. 63-3522. This error occurred during the processing of a *notice of change in water right ownership* form that claimed 6.8 acres of the right and split the right into two separate water rights (nos. 63-3522 and 63-34162). The remaining portion of water right no. 63-3522 should have been 5.2 acres. Additionally, the volume for irrigation was incorrectly reduced from 54.6 acre feet (af) to 23.5 af and the total volume was incorrectly reduced from 50.0 af to 23.3 af. The total volume should have been reduced to 23.4 af, which is calculated from the department standard volume per acre and the number of acres irrigated ($4.5 \text{ af} * 5.2 \text{ acres} = 23.4$). Since the total volume can not be less than the volume for an individual use the volume for irrigation should have also been reduced to 23.4 af. Enclosed with this letter is a copy of water right no. 63-3522 after these errors were fixed and a map that shows the place of use and point of diversion according to the department's current records. The error corrections will become final as described without written notice within 14 days. If you have any questions or concerns regarding these error corrections please contact this office.

Sincerely,

A handwritten signature in blue ink, appearing to read 'PH' followed by a stylized flourish.

Conditions of Approval:

1. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
2. X01 Domestic use is for 1 home.
3. S39 The use of water for irrigation under this right may begin as early as March 1, provided other elements of the right are not exceeded. The use of water before March 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

Comments:

1. kwalker 9/5/2006 Rate of Diversion
Claimant claimed an inch per acre for the lands under this license. License was issued for only 0.15 cfs so have reduced this claim to licensed amount.
2. phummer 4/11/2016 Ownership Split
Change of ownership submitted with transfer 80510, the transfer was withdrawn while the OC was completed and right divided proportionately based on property. Right was decreed with total volume less than the individual volume for irrigation
3. phummer 4/11/2016 POU
Updated Shape
4. phummer 2/16/2017 Error Correction
I made a mistake when processing the ownership change that split a portion of the right into water right no. 63-34162. The volume for irrigation and the total volume should have been 23.4 af, 5.2 acres x 4.5 af at the headgate. Originally I kept the irrigation volume greater than the total volume as it was decree this way but individual volume for irrigation should be reduced to the same amount as the total.
