Subject: Re: FW: Ross Bond Fish Screen

Dear Mr. Richards,

I had an opportunity to speak to Ross regarding the fish screen for his diversion. After talking in length about the situation, we understand why Tom Stephenson would request and need a fish screen for his hydro... he needed to make sure the fish did not clog his jet.

Ross Bond's situation is completely different. This is not a hydro system and it is an entirely different application. The water is only circulating through the pond. With all due respect, we feel a screen is not needed in this case.

Please advise us as to your decision.

Thanks so much,

Rene Salter
Personal Assistant to
Ross Bond, Jr.
