Attachments: Application for Transfer POD_Amended_pg1.pdf

Michael,

Attached is an amended pg 1 per our discussions of adding a POD. Also, I spoke with Lynn Dixon and he is in agreement with the proposed condition below. We discussed the need for continual communication with Palisades Canal to avoid exceeding his water right diversion. Lynn and his manager understand the accounting changes this will bring and are willing and able to work with Palisades Canal to make it successful. Do you need an email or phone call directly from Lynn?

Subject: RE: Lynn Dixon transfer condition

Hi Kristin.

Yes, I think that will work. As you said, it will require working more closely with the canal company. Tony Olenichak said the Water District could add the 2 diversions together for accounting purposes, and the PWU storage deliveries would have to be sorted out between Lynn and the Company when water is pumped after the 1893 priority is cut. Has the company confirmed that they are on board?

Here's a draft amended mitigation condition: To mitigate for injury to other water users caused by the approval of Transfer 81162, the watermaster shall deliver no less than 1.15 cfs of this right into the Palisades Canal to offset historical conveyance losses. Prior to changing the mitigation portion of this right or removing the Palisades Canal point of diversion from this right, the right holder shall obtain an approved transfer from the department and written approval of the change from The Palisade Irrigation Company, Inc.
