Chris,

The attached PDF is a memo I prepared after our last meeting to discuss NKWD's water rights. I think it is a good summary of where things stand from IDWR's perspective. Once you've read the memo, give me a call and we can chat about it, if you'd like.

I see the memo is in water right file 95-10019 but not yet scanned and made available via the website. I'll have that done ASAP.

Also, Chad Goodwin in our Coeur d'Alene office told me today that he has not yet prepared recommendations for NKWD's ground water claims. Apparently there has been some discussion about whether to address NKWD in part 1 of the Basin 95 director's report, due this fall, or part 2, due in the spring.

Regards,

Shelley
