FORM 202 Rev. 07/16

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of IdahoIdent. No. 74-16111

1. Name of applicant(s) Leadore Land Partners LP Phone 406-360-2438
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address P.O. Box 16026, Missoula, MT 59808 Email ktyler@karltylerchevrolet.com

2. Name of representative, if any Tyson Lind - Karl Tyler Phone 406-241-6822
 Mailing address 27 Tyler Ln. Leadore, ID 83464 Email leadoreaugustbells@gmail.com
 a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☒ Send original correspondence to the applicant and copies to the representative.
 b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant.

3. Source of water supply groundwater which is a tributary of n/a

4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
16N	26E	26			NW	SE	Lemhi	Groundwater	

5. Water will be used for the following purposes:

Amount 0.02 cfs for stockwater purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

6. Total quantity to be appropriated is (a) 0.02 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).

7. Proposed diverting works:

a. Describe type and size of devices used to divert water from the source. The well will be designed to pump about 15 gpm with a 2 HP pump. Water will be conveyed by 1-1/2 inch plastic pipe to four troughs by 8,500 ft of pipeline.
 b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
 c. Proposed well diameter is 6 inches; proposed depth of well is 200 feet.
 d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
 e. If well is already drilled, when? n/a; drilling firm _____; well was drilled for (well owner) _____; Drilling Permit No. _____

Received by aj Date 5/12/17 Time 11:00 Preliminary check by _____
 Fee \$ 100 Received by aj Receipt No. W045272 Date 5/12/17

74-16111

8. Description of proposed uses (If Irrigation only, go to Item 9):

- Hydropower; show total feet of head and proposed capacity in kW. n/a
- Stockwatering; list number and kind of livestock. 500 head
- Municipal; must complete and attach the Municipal Water Right Application Checklist.
- Domestic; show number of households n/a
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
16N	26E	26			S														
16N	26E	26														S			
16N	26E	26										S							
16N	26E	35						S											

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Water right 74-16043 is for stockwater from Hawley Creek. This is delivered in an irrigation pipeline and is inadequate for early and late season stockwater needs.

- Who owns the property at the point of diversion? Leadore Land Partners
- Who owns the land to be irrigated or place of use? Leadore Land Partners
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Cattle have previously watered out of open irrigation ditches, however a new gravity fed pipeline to improve irrigation efficiency will leave cattle without access to water. To remedy this situation, a 6" well is proposed to be drilled for the purpose of obtaining stockwater with an associated 8,500 ft pipeline and four stockwater troughs. The 2 HP pump will work at a rate of about 15 gpm and deliver about 13,000 gallons/day for 500 head of livestock.

13. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).

14. MAP OF PROPOSED PROJECT REQUIRED - Attach an 8 1/2" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Application For Permit No. 74-16111

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 8/3/2017 and 8/10/2017. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in cursive script that reads "Jean Hersley".

RE: Application to Appropriate Water in the Upper Salmon River Basin 74-16111

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality, Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the Comprehensive State Water Plan revised by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery.

Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at 208-287-4951, or email me at pam.skaggs@idwr.idaho.gov.

Sincerely,

Chelsey Serrano

Signed for:

Pamela Skaggs

Water Rights Supervisor

Enclosure: Copy of Application

MEMORANDUM

Date: June 21, 2017
To: Water Right File 74-16111
From: Chelsey Serrano
Re: Application Review

Applicant

According to Lemhi County taxlot information, the place of use is property owned by the applicants, Leadore Land Partners Limited.

Source and POD

The water source is groundwater in the Lemhi River basin. The proposed well is in a Wild and Scenic area, so is subject to those processing steps. The POD has been included in ArcGIS layers.

Water Use

The application proposes to use water for stockwater for 500 cattle. The implementation of this water permit is anticipated to be 1 year. The rate and season of use of the proposed permit are in accordance with standard allowances for stockwater permits.

Place of Use

The place of use is four troughs through a 8500 ft pipeline. The troughs are in the SWNE, NWSW, and NWSE quarters of T16N R26E S26 and the NWNW quarter of T16N R26E S35. The POU can be seen on ArcMap.

POU/POD Overlap

There are several irrigation water rights overlapping and in the vicinity of the proposed stockwater use locations. These include 74-7067, 74-16044 – 74-16048, 74-16051 - 74-16054, 74-13 – 74-15, 74-23, 74-24, 74-26, 74-161 – 74-164, 74-7271.

Conditions

The permit is conditioned for possible future water district requirement for a lockable device for watermaster control.

If the requested information is not received within 30 days, the department will return your application unprocessed. The required information is described below.

- The Map was not provided. Item # 14 of the application requires a map of the proposed project that clearly identifies the proposed point of diversion, place of use, section #, township & range.

You may provide the map by sending to the address above, email to jean.hersley@idwr.idaho.gov or fax to (208) 287-6700, attn.: Jean.

Please feel free to contact this office if you have any questions.

Sincerely,

Jean Hersley
