Application Remarks:

Proposed flow rate for wildlife/recreation uses is based on diversion of 0.15 cfs per acre for 161 acres of flow-through field flooding. Field flooding depth will range from less than 1 inch up to approximately 12 inches with an average depth of 6 inches. Flooding will occur intermittently from September through February. Proposed volumes were calculated using the IDWR storage memo 76 spreadsheet and account for associated storage, seepage and evaporation amounts. Regarding seepage, the USDA's Web Soils Survey results show Baldock loam (BdA), Bram Silt loam (BrA, BsA, BsB), Letha fine sandy loams (LtA, LsA) and Moulton loams (MuA, MWA) as the predominate soils. The USDA Soil Survey of Canyon County Idaho (1972 issue) lists a permeability range of 0.06 to 0.20 inches/hour or greater for these predominate soils. As a result, the rate used for seepage loss was calculated using the spreadsheet's maximum 0.2 ft/day for 161 acres. Regarding evaporation, positive precipitation deficits from the Parma AgriMet Station for open water-shallow systems from September through February were used to calculate evaporation losses.

Scale (not to scale)

Warning: Soil Map may not be valid at this scale.

You have zoomed in beyond the scale at which the soil map for this area is intended to be used. Mapping of soils is done at a particular scale. The soil maps for your AOI were mapped at 1:20,000. The design of map units and the level of detail shown in the resulting soil map are dependent on that map scale. Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps show the small areas of contrasting soils that could have been shown at a more detailed scale.

Re: Pond Analysis

The applicant applied for a total volume of 2500 afa which accounts for the "pond" volume (80.5 afa), evaporative volume (27.8 afa), and seepage volume (2382.8 afa). The proposal is to flood a total of 161 acres to an average depth of 0.5 ft. Flooding will occur intermittently during the season of use. Seepage and evaporation were estimated based on a 74 days out of the 181-day season of use. This indicates that the field will not have standing water for 107 of the 181-day season of use. My analysis of the pond agrees with the applicant for the capacity and evaporation estimates. The applicant has estimated seepage based on an assumed seepage rate of 0.2 ft/day for the entire place of use. It is apparent from the SSURGO soil classifications within the POU that the seepage rate for each soil type is a range which goes up to 0.2 ft/day. There are no soil types exceeding the 0.2 ft/day max approvable rate. Therefore, the applicant is justified in using the most liberal estimate of seepage rate in their calculation to ensure that they have enough water.

Re: Diversion Rate

According to a supplemental document submitted with the application, the diversion rate of 24.2 cfs comes from the 0.15 cfs/acre "standard" for wildlife use.

Subject: BID LLC Application Package

Dear Angie,

Enclosed on behalf of BID, LLC are the following:

Notice of Change in Water Right Ownership. All of water rights 63-178C, 63-33498, 63-174, 63-175, 63-5181, 63-21150, and portions of water rights 63-201, 63-5179, and 63-33855. Filing fee for the ownership change notice is \$25 for each un-split right and \$100 for each split right for a total of \$450.

Assignment of Permits. Permits 63-11617 and 63-32066. Filing fee for the assignment is \$25 for each permit for a total of \$50.

Application for Permit (north of Boise River). Proposes diverting 24.3 cfs from the Boise River for wildlife and recreation uses (intermittent field flooding) during duck season. Filing fee for the application is \$1,110.

Application for Permit (south of Boise River). Proposes diverting 24.2 cfs from the Boise River for wildlife and recreation uses (intermittent field flooding) during duck season. Filing fee for the application is \$1,110.

Application for Amendment of Permit 63-33910. Proposes adding a "non-pump" diversion point from the Boise River to the system. Filing fee for the amendment is \$100.

Change in Address Notice for Permit 63-33910. This document does not require a filing fee.

Check No. 1026 for \$2,845 is enclosed for the filing fee. The check was written based on the assignment of three rights originally considered, then later revised to two rights as submitted. Please refund the applicant the extra \$25 paid.
