

MEMORANDUM

TO: Active rights 65-23207, 65-23209, 65-23295, 65-23296, 65-23297, 65-23298, 65-23625 & 65-23626

FROM: Patrick Kelly

DATE: 3/6/2017

SUBJECT: Correcting ownership changes for splits of parent rights 65-2590A & 65-11272B

65-2590A and 65-11272B were decreed in 2002 with no combined use limits. In sum, the rights totaled 1.81 cfs on 90.5 acres. These rights shared the same shapefile after the recommendation was made, however the acres described by the rights are believed to be independent with no overlap. See an attached map where I have assigned acres according to the QQ description. Govt. Lots are recognized by the lot number, rather than the QQ assignment.

2007 Ownership Change: An OC was filed by the Garner's in 2007 for Montgomery rights 65-2590A and 65-11272B. The OC was processed granting the Garners 4.0 acres from both rights. The split portions pertaining to the Garner property were given the water right numbers 65-23207 & 65-23209. Both rights were granted 0.08 cfs for 4.0 acres with a combined use limit added totaling 0.08 cfs on 4.0 acres. By priority, this makes 65-23207 (the split portion of 65-11272B) meaningless since it adds neither rate nor acres to the limit.

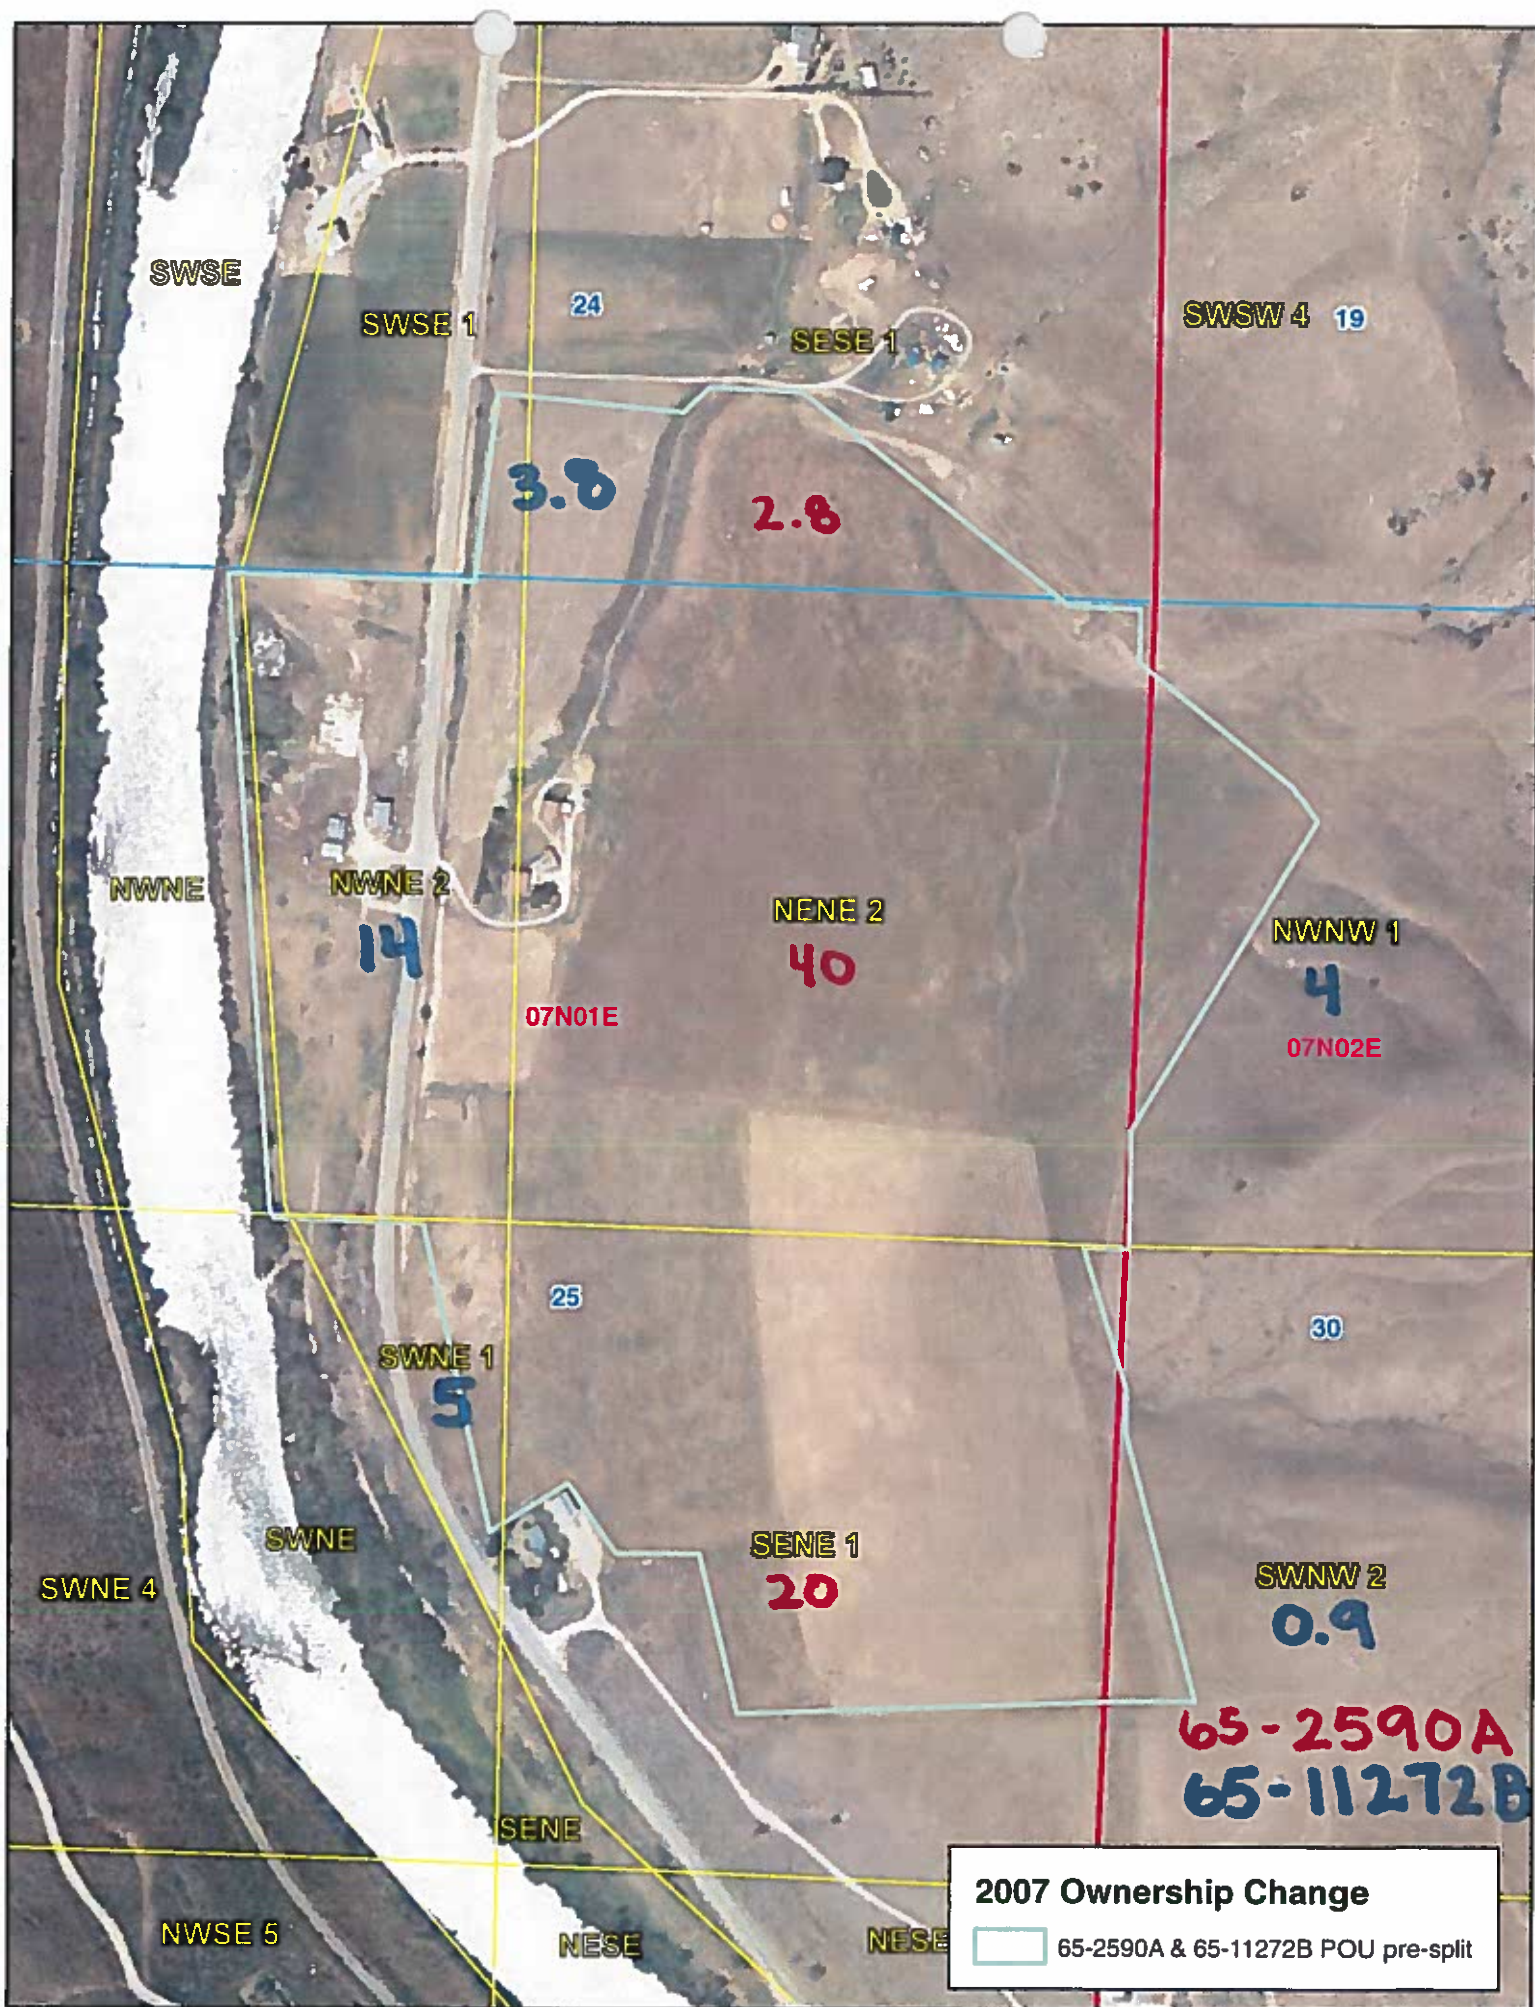

The remainder of the Montgomery rights were given #'s 65-23206 and 65-23208. The rate and acres for each right equated to what was left after the Garner rights were subtracted. However, a combined use analysis was completed to combine the 2 rights to 1.29 cfs on 62.7 acres. This action reduces the rights overall by $(1.81 - 1.37)$ 0.44 cfs and $(90.5 - 68.7)$ 21.8 acres. The rights were protected from forfeiture since they were within the 5 yr. window from when they were decreed. It is my belief that the reviewer of the ownership change cited overlap since the decrees authorized a total of 54 acres in the NENE L2 QQ. Comments made by the reviewer suggested that the shapefile was incorrect. However, since land within the govt. lot totals 54.0 acres, overlap should not have been considered.

In summary, the recommendation shape files for 65-2590A and 65-11272B extend all the way to the Payette River. The 2 decreed rights authorize a total of 54.0 acres in Section 25 Govt. Lot 2 and total 90.5 acres. Ultimately, combined use limits should not have been added via the ownership change process.

The Garner property totals 6.0 acres. An ownership change should have granted 0.08 cfs and 4 acres from 65-2590A within the NENE L2 to 65-23209. 65-23207 should be described as 0.04 cfs and 2.0 acres from 65-11272B in the NENE L2 QQ description but redefined in the NWNE L2. Updates to reflect this have been made based on my review.

2008 Ownership Change: In 2008, the department processed an ownership change filed by the Cooks. The Cooks were changing ownership for rights on their portions of land pertinent to the Montgomery rights 65-23206 and 65-23208. These rights were split to maintain the combined use limits created in the 2007 ownership change. Transfer No. 81192 filed by the Cooks allows me to remove the combined use limits, and properly analyze the water right validity.

2015 Ownership Change: The Long's filed an ownership change for their land under 65-23295 and 65-23297. These rights were split to maintain the combined use limits created in the 2007 ownership change. Rate and acres on 65-23625 and 65-23626 will not change and are not subject to forfeiture since they are not under review for transfer 81192. As associated rights, the combined use limit with Montgomery rights is being separated. A new limit will be added to the Long rights to reflect the direct overlap of 65-23295 and 65-23297. The new combined use limit for these two rights total 0.22 cfs on 10.9 acres. I am comfortable with this limit since the parcel totals 12.0 acres and matches what could potentially be irrigated.
