Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. - D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

Aberdeen-Springfield Canal Company owned well discharging into main line.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
Pump and well	groundwater	none

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☐
If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
35-2543	Irrigation	3.2	640	160		3.2	640	160
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	3.2	640	160
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it Attachment 4B:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it Attachment 4C:

Ongoing dispute with IDWR regarding Aberdeen-Springfield's use of recovery wells required this exact same rental in 2016.

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental?

If yes, describe:

Yes ☐ No ☒

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV?

Yes ☐ No ☒

If yes, describe the date and location of the NOV.

RE: APPLICATION TO LEASE AND RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO. 35-2543

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your applications to lease water to and rent water from the Water Supply Bank. I have enclosed two original Water Supply Bank Lease Contracts and a Water Supply Bank Rental Agreement for your review and signature. Please sign and return ALL Lease Contracts and Rental Agreement within 14 days. Upon signature and return of the original contracts and agreement the Department will also sign the original contracts and agreement and return executed copies to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$10,880.00 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 640.0 acre-feet. Since you are both the lessor and the renter of the right, **you are only obligated to pay the 10% administrative fee or \$1,088.00.** Please find enclosed a receipt in the amount of \$1,088.00.

If all signed leased contracts and signed rental agreement are not received within 14 days, your lease/rental package may be in danger of being returned without being executed, in such case the lease application fee will not be refunded.

If you have any questions, please contact this office at (208) 287-4800.

Sincerely,

Debra Sudd

Aberdeen Springfield Canal Company Rental Application 2017

MEMORANDUM FOR APPLICATIONS # 826 & 827

To: Water Right 35-2543

From: Clay Webster

Date: 6/23/2017

Re: Review & Analysis of Applications to Lease Water into and Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The Department received applications to lease and rent 3.2 cfs and 640 af to move the point of diversion for this water right approximately 3 miles south of the original location for Aberdeen Springfield Canal Company. This move will allow them to be able to deliver water to the portions of their service area that they currently cannot reach. This is a repeat of their rental that they had for 2016.

I have used the same methodology as last year to calculate the amounts for the lease and rental. They are seeking enough water for 160 acres worth of irrigation. Standard irrigation use for the area is 0.02 cfs and 4.0 af per acre.

$0.02 \times 160 = 3.2$ cfs

$4.0 \times 160 = 640$ af

AUTHORITY TO FILE: These applications were signed by Steve Howser. He is listed as the Secretary and the Registered Agent for the Aberdeen Springfield Canal Company. They are the owner of record for this water right.

WATER RIGHT VALIDITY: This water right was decreed in 2012. This portion of these rights was leased in 2016. I have no forfeiture concerns at this time.

INJURY TO OTHER WATER RIGHTS: The leased and rented PODs fall within the ESPA. The applicant provided modeling. I have checked that modeling and verified that no mitigation is required for this move.

ENLARGEMENT OF USE: The proposed rental agreement will only move the point of diversion. No change to authorized diversion amounts or irrigable acres are being sought.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District # 120. Comments have been requested from the watermaster via e-mail.
